

**NEW!**  
VertiTex with Zip

reddot design award  
winner 2008

Winner of the red dot design  
award 2008 for high quality of  
design

*The vertical awning that  
provides privacy and sun protection*

Create a private environment on your patio with VertiTex –  
*transparent, air and light permeable*

Without **VertiTex**, your patio is wide open to cross winds, low-lying sun and curious onlookers. With **VertiTex** you can create a decent amount of privacy – for your patio roof or your conservatory.

## *Spend quality time on your patio – undisturbed!*

Feel right at home – well protected from low-lying sun, winds and curious onlookers

With the **VertiTex** vertical shade, you can shade your patio or your windows exactly as you please and block out the sun no matter where it stands. The well-engineered mechanics make retrofitting the **VertiTex** system an easy task. The system blends in neatly with weinor patio roofs and conservatories.

Choose from 47 frame colours, 8 scratch-resistant and robust trend colours and a further 200 special RAL colours!

### Soltis® fabrics

Fabrics from the Soltis® collection go particularly well with **VertiTex** (see above photo). While no one can look in, you can see everything from inside. Soltis® fabrics are highly tear-resistant and dirt-repellent. The built-in micropores provide enhanced ventilation.

### Acrylic fabrics

Alternatively, you can opt for one of nine exceptionally robust, seamless acrylic fabrics. The nano-coating provided keeps the surface from soiling quickly and prevents mould stains.

### Transparento fabrics

Made of see-through poly-glass film, these transparent synthetic fabrics offer shelter from the wind and other elements without restricting your view. They are tear-resistant and elastic and can withstand temperatures of up to about 65°C. **Transparento** fabrics are particularly well-suited for use in the catering trade.

## Coordinated aesthetics cut from the same cloth

With its connecting cover caps, the shades in your conservatory will appear completely uniform and create an enclosed area.

## *Perfect for patio roofs, conservatories or windows*

Since the weinor system all comes from one and the same source, everything from the technology to the colours matches up perfectly

The **VertiTex** system can be used in many ways and can be retrofitted easily thanks to its sophisticated technology. Choose from **VertiTex WeiTop**, which locks into the gutter on our WeiTop roofs, **VertiTex Universal** for windows and balconies, or **VertiTex Zip** with rail guide for difficult-to-reach areas.

## Convenience by remote control

You can control your **VertiTex** in total comfort from your favourite spot.

# Shading for large areas

with the VertiTex – for widths of up to 6 m

**NEW**

### VertiTex WeiTop

The **VertiTex WeiTop** vertical shade is simply hung into the guttering of the weinor patio roof or conservatory and the side fittings screwed into place. In next to no time, you will be able to use your patio or your conservatory with no disturbances. With a maximum width of 600 cm and a height of 240 cm, even large areas can be shaded without interruption.

*Easy, yet perfect installation of your vertical shade*

**VertiTex WeiTop** to hang in your guttering

### VertiTex Universal

Thanks to its various installation methods the **VertiTex Universal** is, of course, also suitable as a shade for your windows or balcony. The small housing and the unobtrusive rope guide blend into the surroundings and form a unified whole with the windows. The **VertiTex Universal** can be retrofitted easily.

**VertiTex Universal** can be mounted on a wide variety of surfaces

*(different housing dimensions apply depending on the version)*

### VertiTex Zip

In areas with strong winds, the **VertiTex Zip** prevents the vertical awning from knocking against other surfaces. This is made possible by the guide rails situated to the left and right of the window. The result: optimised product protection. With the rails holding the fabric snug against the windows, the **VertiTex Zip** also guards against insects

**VertiTex Universal with Zip** wall mounting

## Award-winning design

weinor is known for its first-rate product design – and now has the award to prove it! The weinor **VertiTex** has received the internationally acclaimed **red dot award** from Design Zentrum Nordrhein Westfalen.

**reddot** design award  
winner 2008

*Other makes can also be easily fitted with the **VertiTex** at a later date if required.*

Technical details	VertiTex WeiTop	VertiTex Universal	VertiTex Zip

## We offer the very highest quality

weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service, so you can enjoy your VertiTex for a long time.

# *Proven top quality*

Awning technology for the highest demands

### **VertiTex technology you'll embrace for a long time**

Thanks to the patent pending "floating bearing with brush mechanism", the fabric is far less prone to creasing.

Stainless-steel guide bolts and the floating bearing connection to the front rail make certain that there is enough play to withstand strong winds. The bolts ensure that the shade can be opened and closed safely without jamming.

### **Made in Germany – certified top weinor quality**

Quality is our uppermost aim. That's why all our products are designed with durability and safety in mind, as numerous certificates from Germany's inspection authorities (TÜV) show. weinor invests a lot in the development of new products. The result: innovative products made in Germany.

#### **Longevity**

We don't cut corners, big or small. All our small parts such as screws, nuts and bolts are made of stainless steel so they will last especially long. All other parts are powder coated in an elaborate process. This makes them impact and scratch resistant.

### **The best advice from your experts**

The best way to get an idea of what the ideal VertiTex system is for your window or patio is to get advice from an expert. Our competent dealers will be happy to advise you, giving you sound advice and assistance on all technical and aesthetic matters.

▲ weinor awnings

# Your dream patio at any time of year

▲ weinor conservatories

No matter what you want to use your patio for, weinor has the right product for you – awning, patio roof, Glasoase® and conservatory

As an experienced specialist, your weinor dealer will help you throughout the process, from planning to completion. They will help make your patio dreams come true and will support you with advice and help. That way you stay on the safe side at all times.

**Important Informations:**

**For textile sun protection:** Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for protection from the sun and should be rolled up in rain

and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).  
**For patio roof, Glasoase®, conservatory:** contact a qualified conservatory builder for information on the causes of condensation and occasional cracking noises, and on how to avoid these from the outset during the planning stage.
