

# Course Syllabus Review Statement And Signature Form

I have read the syllabus for MATH 1106, Fall Semester 2008, and have had an opportunity to ask the instructor any questions I may have about it. I understand its contents, including the course requirements, that there are no makeup tests and the grading policy. In conjunction with this course, I agree that any computer difficulties I experience are my responsibility and not grounds for extensions of homework due dates.

MathZone is accessible from most lab computers on the KSU campus. You may also access MathZone from your own computers after installing the required browser plugins via the Installation Wizard.

Mark your scheduled class time:
