How to Use eForms

<u>About eForms</u>

eForms is your source for electronic forms and other documents from all lines of business in the MetLife Enterprise. You can search for forms using several search criteria. These include searching by form **name**, **number**, **form properties** (such as states forms are used in, form types and categories), and **groups of forms** with a similar purpose. A producer-focused search finds forms needed to sell a particular product, or provide service, in a certain state **without needing to know form numbers**.

Once located, forms can be viewed, printed, faxed, or emailed. These Action Options are shown with a yellow background on the page.

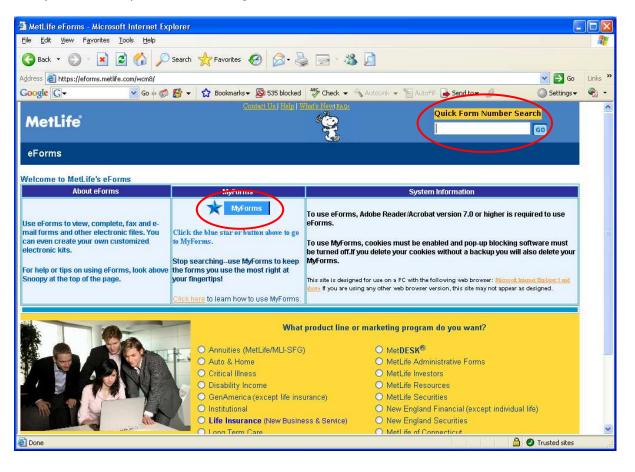

View/Print	Description	MyForms	eMail	Fax	Add to Kit
đ	0	*	***	FAX	

You can create your own **customized electronic kits**, and can save your most frequently used forms to *MyForms*, a feature that allows **quick retrieval without searching**.

Using eForms: An Overview

Forms in eForms are generally associated with a product line or line of business (life insurance, annuity, auto & home, etc.). Administrative and some lower volume product forms are associated to their carrier (MetLife, GenAmerica, etc.). Accordingly, the first question we ask on the eForms home page is "what product line do you want."

There are two exceptions to the general rule. The first is *MyForms*, and the second is the **Quick Form Search**. These features help you find forms you are familiar with quickly and easily, without repetitive searching or drill-downs.

How to Use MyForms

The *MyForms* feature in eForms allows you to **create and maintain** a folder containing **just the forms you most frequently use**, separated by franchise or product line. *MyForms* is available from any page in eForms.

To add a form to your *MyForms*, first find the form you want to add. There is no restriction on how you search for the form. When you have the form you want listed, **click the blue star**

to add it to your *MyForms*. The blue star is to the right of the form description icon in the six action options that are available for each form returned.

Once you have added a form to your *MyForms*, you can easily go to it by clicking the *MyForms* tab from any page in eForms. A listing of your *MyForms* will be displayed, organized by

product line. You can remove forms from your *MyForms* by clicking the **Remove** icon for the form you no longer want: you can also remove all forms you have saved for a given product line by clicking the **Remove All Forms** link at the bottom of the product line forms listing.

) Https://eforms.metlife.com/wo	:m8/myforms.jsp				🔒 🕑 Trusted sites	.:

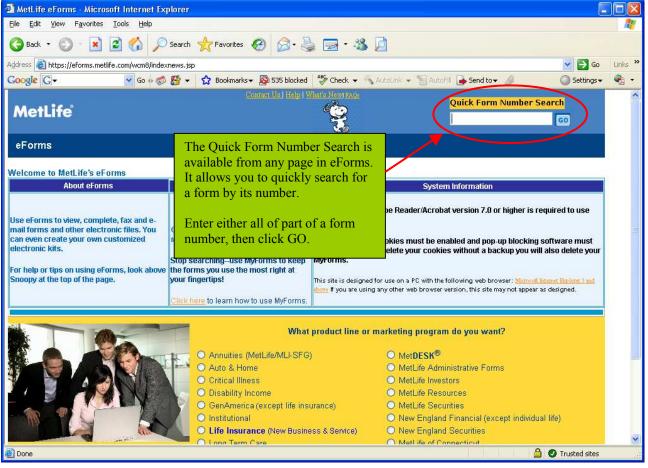

<u>Important Note:</u> *MyForms* does not store copies of the actual forms on your computer. It stores the information about the form you've saved in a "cookie" that is stored on your computer: the cookie retrieves your form from eForms when you connect to the site and select your form. You must have cookies enabled to use *MyForms*. In addition, if you delete your cookies without backing them up you will lose your *MyForms*.

Any form that you have saved in *MyForms* will be automatically updated if a new version comes out, or if the form is obsolete and not replaced. However, in cases where new forms are released but are not immediately available in all states, you will need to check with your marketing area and update your selections when the new form is available in your state.

How to Use the Quick Form Number Search

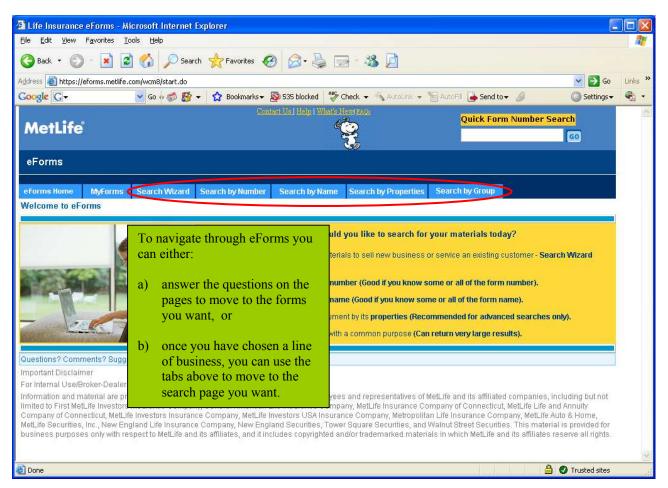

The **Quick Form Number Search** feature is available from any page in eForms. It allows you to quickly search for a form by its form number.

To use the **Quick Form Number Search**, enter either **all or part** of the form **number** (entering part of the number will return more forms) in the field, **then click GO**.

<u>Navigating eForms</u>

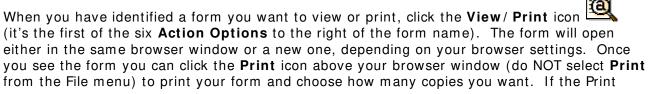

There are two ways to navigate the eForms site. The first is to answer the questions on the pages to move to the forms you want. Alternatively, once you've chosen a line of business from the eForms home page you can click the tab of the page you want to move directly to that page.

How to Find Your Forms

Once you have selected a line of business, you will proceed to a page asking you how you want to search for your materials. An explanation of each search is provided, along with a tip of the best use for each search. When you make your selection, you will proceed to another page where you can enter the details of your search request and submit them to retrieve your forms.

How to View and Print Your Forms

menu selection and icon is **grayed out**, the form is **only available for viewing** and it **not** allowed to be printed.

If your printer supports duplex printing (printing on both sides of the paper) this option is strongly recommended to facilitate savings.

Note that email addresses must be the full Internet address (i.e.,

<u>ismith@metlife.com</u>. The forms will be e-mailed as an **attachment** to the email. Only one attachment will be created regardless of the number of forms selected. Whenever possible forms should be e-mailed rather than faxed. Please be aware that Internet Service Providers (ISP) have different standards on accepting emails with attachments, including limiting the size of attachments or even not accepting them at all. If your email does not go through you should check with the recipient's ISP to determine what the problem is.

How to Fax a Form

To fax a form, click the Fax icon in the Action Options (it's next to the eMail icon).

🙆 Done							Trusted sites		

Note: A login screen may pop-up. Your user id and password for eForms emailing, faxing and shopping cart is the same as your portal id and password. This is the same user id and password that you use for ePay Statements, Associate Information Center, or Empire Time. If you have problems with your id and password, or don't know your user id or password, please contact the MetLife HelpDesk at 1-800-ASK-MET2.

A page will display with sender and recipient information including, fax numbers. NOTE: You must enter the fax number including 1 + the area code. This is necessary because eForms does not fax through your telephone line, it uses an external fax server which is most likely not local to where you are faxing to. Also, we recommend that forms should be e-mailed whenever possible, rather than faxed. This is because the quality of the forms transmitted is much better with e-mail; also, the forms are received much quicker and at less cost.

Creating Electronic Kits

To view more than one form at a time, or to create a customized electronic package of

forms, choose the forms you want by clicking the **Add to Kit** checkbox in **the Action Options** for each form you want included in the package. If the checkbox is checked, the form is selected to be **included** in the package; if the box is not checked, the forms will **not** be included.

<u>Troubleshooting</u>

1) Error Message: Page Displays File Does Not Begin with % PDF

Problem: Adobe Acrobat or Reader is incorrectly installed.

Solution: Uninstall and reinstall Adobe Acrobat or Reader.

Procedure: First, you must have administrative rights for your computer. You can tell if you have administrative rights by going to Control Panel|Printers and Faxes. If the Add Printer option is grayed out you don't have the necessary rights and will need an administrator to perform this procedure. If you are able to add a printer you do have administrative rights and can proceed.

Next, go to Control Panel|Add/Remove Programs.

🕏 Control Panel

If you have both the free Adobe Reader program and Adobe Acrobat installed you will need to uninstall both. Once Adobe has been successfully removed you can reinstall the program either from your installation CD or by proceeding to the Adobe website (http://www.adobe.com) and installing the free Adobe Reader. This procedure is required by Adobe to install the software correctly; you can't just install the program on top of an already installed program.

2) Problem: After a form is viewed, clicking the Back button returns you back to the search selection screen, forcing you to reenter your search criteria all over again.

Issue: This isn't really an error, but instead is how Adobe is set up to work with your browser.

Solution: Change how your forms are displayed in Adobe. Open Adobe Acrobat or Reader and select Preferences – General from the Edit menu.

On the left side of the dialog box, click Options. Then uncheck Display PDF in Browser, then click OK and close Adobe.

P	Preferences					
	Accessibility Batch Processing Color Management Comments Digital Signatures Display Extract Images Forms	 Web Browser Options Uncheck Display PDF in Browser, then click OK button Display PDF in Browser Check Browser Settings When Starting <u>A</u>crobat Allow <u>Fast Web View</u> Allow <u>Background Downloading</u> 				
Options	Identity JavaScript Layout Grid Online Comments	Startup Display Splash Screen Certified Plug-ins Only Miscellaneous				
	Search Self-Sign Security Spelling TouchUp Update Web Buy	 Use Page Cache ✓ Use Logical Page Numbers ✓ Allow Eile Open Actions and Launching File Attachments ✓ Open Cross-Document Links In Same Window ✓ Skip Editing Warnings ✓ Save As Optimizes for Fast Web View Reset All Warnings 				
		OK Cancel				

Now when you click on a form to view/print it, Adobe will open in a separate window with your form. After you've viewed or printed your form, close Adobe and you'll be right back in eForms where you were. This will work any time you open a PDF file in Internet Explorer, not just in eForms.
