## 2012 Wisconsin Agricultural Statistics

It is amazing how the weather affects Wisconsin's growing seasons. There were record yields for corn and soybeans in 2010. The 2011 growing season got off to a late start due to a cool, wet spring. High temperatures during June and July, along with adequate rainfall over most of the state, allowed crops to catch up and post decent yields. The 2012 growing season got off to an early start followed by extreme heat and drought in the southern half of the state.

Milk prices during 2011 were high, with the last seven months being over \$20.00 per cwt. However, input costs are higher and the 2012 drought will affect feed costs. Milk production has continued to rise as dairymen and cows adapt to weather conditions. It is very important to have extensive current and historic agricultural data. This helps producers and others in the agricultural sector make informed business decisions.

The 2012 issue of Wisconsin Agricultural Statistics contains information on the state's crop, livestock, and dairy production that is used by farms and businesses in their production, marketing, and planning activities. This statistical bulletin is also posted on our website listed above. The website is updated frequently as new reports become available.

We have begun preparations for the 2012 Census of Agriculture. Questionnaires will be mailed to every farm in the nation starting in late December.

This publication would not be possible without the cooperation of thousands of Wisconsin farmers and others who recognize the value of good information and respond to questionnaires and interviews. Thanks also to the dedicated enumerators and office staff who collect and compile the data.

Robert J. Battaglia  
Director

September 2012

State of Wisconsin  
Governor Scott Walker

## Department of Agriculture, Trade and Consumer Protection

Ben Brancel, Secretary

As you can see from this report, the 2012 Wisconsin Agricultural Statistics bulletin, agriculture continues to be a bright spot in the economy in general and in Wisconsin in particular.

In this bulletin, we are looking at our agricultural production for 2011. Despite a late start and an early end to the growing season, we produced record corn and winter wheat crops. In that, we were bucking a national downward trend that resulted in high prices for our farmers.

The report will tell you that we still lead the nation in cheese production – we make 25 percent of the nation's cheese. No other nation makes as much cheese as we make here in Wisconsin. That included 586 million pounds of specialty cheeses. Much of that is made in small local plants that are providing jobs in rural Wisconsin.

We produced a record 26.1 billion pounds of milk in 2011. With the advent of our Grow Wisconsin Dairy 30 x 20 initiative to boost profitability and milk production, we are aiming to keep that growth going. We are shooting for 30 billion pounds in 2020, enough to keep our dairy infrastructure running on fresh, high quality Wisconsin milk.

Hitting \$2.85 billion in exports was another bright spot for Wisconsin agriculture in 2011 – another record year.

Those are the kinds of numbers that lead to the bigger numbers: Agriculture contributes more than \$59 billion to our state's economy every year, supports almost 354,000 jobs, provides more than \$20 billion in income, and pays \$2.5 billion in state and local taxes. That's money that supports our urban neighbors as well as rural areas.

These are the numbers that help farmers and agribusinesses plan ahead and are plugged into the policy-making equations. This report may be a look back, but in a sense, it is also a window to the future.

Sincerely,

Ben Brancel  
Secretary

*Agriculture generates \$59 billion for Wisconsin*

## \$11.7 BILLION CASH RECEIPTS FROM FARM MARKETING

Wisconsin cash receipts from farm marketings totaled \$11.74 billion in 2011, a 27 percent increase from 2010. Receipts from livestock, dairy, and poultry comprised 63 percent of the total marketings of all commodities, compared to 64 percent the previous year. Milk sales totaled \$5.25 billion in 2011, a 26 percent increase from 2010. During the same period sales of meat animals increased 40 percent, poultry sales rose 3 percent, and miscellaneous livestock sales were up 5 percent.

In 2011 cash receipts for all Wisconsin crops totaled \$4.33 billion, 30 percent more than in the previous year. Sales of feed crops rose 49 percent from 2010. Corn sales were up 53 percent, to \$2.10 billion in 2011. Soybean receipts, at \$845 million, grew 8 percent. Total vegetable marketings increased 18 percent, led by fall potatoes, which increased 10 percent from the previous year. Fruit and nut receipts increased 12 percent, with cranberries up 13 percent from 2010.

Wisconsin farm production expenditures totaled \$9.60 billion in 2011, up 12 percent from \$8.60 billion in 2010. A majority of the seventeen expenditure categories showed an increase from the previous year. Tractors and self-propelled farm machinery increased 77 percent, followed by trucks and autos, at a 50 percent increase. Feed expenditure increased 33 percent and other farm machinery increased 27 percent. The only categories to show a decrease were livestock, poultry and related expenses; rent; labor; and taxes. More than one third of total farm expenditures in Wisconsin went to feed, farm services, and labor. Expenditures per Wisconsin farm averaged \$124,286 in 2011, which was 18 percent less than the national average of \$146,653 per farm.

The year 2011 saw a greater number of agricultural land sales, with a 22 percent increase in the number of acres of all agricultural land sold in Wisconsin. In total 132,872 acres of agricultural land were sold, up from 108,518 acres in 2010. The average value of all agricultural land sold increased 10 percent, from \$3,953 per acre in 2010 to \$4,332 per acre in 2011.

The total number of farms in Wisconsin in 2011, at 77,000, decreased 1 percent from 2010. Numbers of farms with sales of \$10,000 to \$99,999 and farms with sales of \$500,000 or more declined while the number of farms with sales of \$100,000 to \$249,999 increased. Farm sales of \$250,000 to \$499,999 remained the same. Land in farms totaled 15.0 million acres, a decrease from 2010, while the average size of a Wisconsin farm remained at 195 acres.

1/Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors of production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. 2/A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. 3/Revisions. Source: Economic Research Service, USDA.

# Crops

---

After a late, cold start, 2011 saw a roller coaster growing season. April's snows and cold rain allowed little advancement in spring tillage and planting. Frosts continued well into May, as excess rain and unseasonably cool temperatures delayed crop emergence. A warm, dry start to June allowed soil moistures to drop below 95 percent adequate-surplus statewide, but moisture levels climbed back above 94 percent adequate-surplus by the end of the month as rains and cool temperatures returned. July and early August brought unrelenting heat, boosting crop growth and drying out fields. By the end of August, soil moistures were short or very short for 35 percent of the state, with the most pronounced shortages in southern Wisconsin. September remained very dry, with lower than average temperatures. An early frost mid-month halted the growing season in some northern parts of the state. Temperatures then climbed briefly into the 80s in early October before settling back to more seasonable levels. Dry, warm conditions allowed harvests, haying, and fieldwork to quickly catch up to and surpass five-year averages. In spite of a mid-month snowstorm, temperatures remained above average throughout November. Rain and melting snow brought muddy field conditions to the eastern parts of the state, while bypassing the northwest. However, the overall mild fall weather proved favorable for harvest and fieldwork, particularly fall tillage. On November 27, fall tillage was 82 percent complete, well above the five-year average of 68 percent.

Statewide temperatures from June to September were 1.0 degrees above normal (based on 1971-2000 data) in 2011, continuing the trend from 2010. April through June and September had slightly below normal temperatures, with May averaging 2.1 degrees below normal. July and August had above normal temperatures, with July averaging 3.9 degrees above normal. November had the greatest departure from normal temperatures, at an average of 4.6 degrees above normal.

Precipitation totals for April through September were below normal across the state, with a statewide total of 21.00 inches. This was 10.36 inches below the total for 2010 and 1.33 inches below normal. Total precipitation in the northern third of the state was 1.20 inches below normal for April through September, while the central third of the state was 0.43 inches below normal, and the southern third of the state was 2.12 inches below normal precipitation.

Corn planted for all purposes totaled 4.15 million acres in 2011, a 6 percent increase from the previous year. Acres harvested for grain were 3.32 million acres, up 220,000 acres from 2010. Grain yield decreased to 156 bushels per acre, down from 2010. Acres harvested for silage increased 7 percent, to 805,000, while silage production increased 10 percent, to 15.7 million tons.

Planted acres of soybeans decreased by 30,000 acres, to 1.61 million acres, and producers harvested 1.60 million acres, 30,000 less than in 2010. The average yield for soybeans in Wisconsin was 46 bushels per acre, 4.5 bushels per acre less than the previous year. Due to the decrease in yield, total soybean production was 73.6 million bushels, down 11 percent from 2010.

Acres of winter wheat planted increased 52 percent from 2010, to 345,000 acres, and acres harvested were 335,000 acres, up 46 percent from 2010. Production increased 48 percent from 2010, to 21.8 million bushels. Winter wheat yield was 65 bushels per acre, up 1 bushel per acre from 2010.

The late spring delayed the start of haying, but the first cutting quickly caught up to averages, finishing up by early July. Second-cutting hay stayed ahead of the five-year average, though the high humidity of July and August made drying hay difficult. On September 4, third-crop hay was 93 percent harvested, compared to 87 percent in 2010 and a five-year average of 85 percent, while fourth-crop hay was 27 percent harvested, compared to 31 percent in 2010 and an 18 percent five-year average. Though short soil moisture adversely impacted fourth-crop yields in some areas, the dry, sunny weather of late summer and fall allowed some southern Wisconsin producers to take a fifth crop in early October.

Wisconsin topped all states in the nation for oat production in 2011, at 7.13 million bushels, though this was a decrease of 38 percent from 2010. This decrease was due to fewer harvested acres and lower yields. Acres planted, at 210,000, decreased from 2010, while acres harvested decreased 55,000 acres from the previous year. Average yield increased 4 bushels, to 62 bushels per acre.

Potato harvested acreage increased 1 percent from 2010, with producers harvesting 62,500 acres in 2011. The average yield increased 5 cwt. per acre, to 400 cwt. per acre. Overall production was 25 million cwt., up 3 percent from the previous year.

For processing vegetables, Wisconsin ranked second in harvested acreage, production, and value of production. Wisconsin remained the top producer in the nation for snap beans, contributing 44 percent of the national production. Wisconsin was second in production of carrots and peas for processing, and third in production of processing sweet corn.

Cranberry acres harvested remained at a record high 18,000 acres for the third straight year. Cranberry production in Wisconsin increased 450,000 barrels from 2010, to 4.41 million barrels, with yields averaging 245.0 barrels per acre. Wisconsin remained the top cranberry producing state, with 56 percent of the national production. Bearing apple acreage in Wisconsin decreased for the twelfth year in a row, to 3,800 acres. Apple production increased 14.4 million pounds from last year, to 51.4 million pounds. Tart cherry production increased 17 percent from 2010, to 6.7 million pounds in 2011.

### STRAWBERRY PRODUCTION & VALUE Wisconsin

# Livestock & Dairy

---

## \$7.41 BILLION IN CASH RECEIPTS FOR LIVESTOCK AND PRODUCTS

In 2011, Wisconsin produced 26.1 billion pounds of milk, a 0.3 percent increase over the previous year. The number of milk cows grew steadily throughout the year, and milk per cow rose from 20,630 pounds in 2010 to 20,646 in 2011. Milk prices began the year at \$16.20 per hundredweight (cwt.) in January, rose to a high of \$22.60 per cwt. in August, and ended at \$20.90 per cwt. by the end of the year. This was accompanied by increases in cash receipts from marketing from \$4.15 billion in 2010 to \$5.25 billion in 2011, and value of production rising from \$4.19 billion to \$5.30 billion.

Wisconsin maintained its status as the nation's largest cheese producer in 2011. Total cheese production, from 2010 to 2011, rose 0.7 percent to 2.63 billion pounds. Italian cheese production was up 6.6 percent in 2011 to 1.35 billion pounds. This comprised nearly 51 percent of Wisconsin's production. Production of American cheeses fell 6.4 percent to 794 million pounds. Specialty cheese production grew from 568 million pounds in 2010 to 586 million pounds in 2011, accounting for 22 percent of the state's total cheese production.

The total inventory of cattle and calves on January 1 fell 1.4 percent from 2011 to 2012, to 3.40 million head. The number of milk cows held steady at 1.27 million head. Beef cows also held steady at 265,000 head. Slaughter price per cwt. of cattle rose on the U.S. level to \$113.00, while calf prices rose 21 percent to \$142.00 on the U.S. level. The value of production rose 34 percent to \$1.16 billion.

As of December 1, 2011, swine inventory held steady from the previous year at 340,000 head. Meat production totaled almost 175 million pounds (live weight basis), an increase of 1 percent. Average price per cwt. on the U.S. level increased 20.7 percent to \$65.30, raising the value of production from \$110 million in 2010 to \$136 million in 2011.

Sheep and lamb inventory fell 6.6 percent from 2011 to 2012, to 84,000 head as of January 1. Total goat inventory decreased 3.0 percent to 65,900 as of January 1, 2012, with Wisconsin still having the largest number of milk goats in the nation, at 44,000.

Egg production decreased 2.6 percent to 1.28 billion eggs for the year ending November 30, 2011. There were 4.64 million layers, with an average of 275 eggs per layer. The egg price per dozen rose 13 percent to 81 cents in 2011. The value of production increased 10 percent to \$86.1 million for 2011.

In 2011, broiler production held steady at 46.5 million head. The price of broilers decreased 2 percent to 47 cents per pound. The increase in broiler production and price led to a 2 percent decrease in value of production.

The total sales value of trout increased by 14.3 percent in 2011 to \$1.86 million. Trout distributed for restoration, conservation, or recreational purposes decreased to 4.02 million fish, 19 percent fewer than the previous year.

Wisconsin produced 1,050,580 mink pelts in 2011, an increase of 19 percent from 2010, more than any other state. The U.S. average price per pelt rose 15 percent to \$94.30. The total Wisconsin value of pelts increased in 2011 to \$99.1 million.

Honey production fell 12.3 percent, from 4.10 million pounds in 2010 to 3.60 million pounds in 2011. The number of honey-producing colonies fell, from 64,000 in 2010 to 57,000 in 2011. The result was a 1.6 percent decrease in yield per colony, from an average of 64 pounds in 2010 to 63 pounds in 2011. The average price of honey rose to \$1.80 per pound. Wisconsin ranked ninth in the nation in honey production for 2011.

## WISCONSIN CROPS: Usual Planting and Harvesting Dates

Crops	Usual planting dates		Usual harvesting dates			Principal producing areas	
	Begins	Ends	Begins	Most active	Ends	Districts	Counties
<b>FIELD CROPS</b>							
Corn for grain	April 26	June 4	Oct. 2	Oct. 14 - Nov. 17	Nov. 28	SC	Dane, Rock, Grant
Corn for silage	April 26	June 4	Sept. 8	Sept. 13 - Oct. 13	Oct. 19	EC, SC	Dane, Fond du Lac, Marathon
Soybeans	May 7	June 14	Sept. 29	Oct. 4 - Oct. 29	Nov. 8	SC	Rock, Dane, Dodge
Oats, spring	April 11	May 18	July 22	July 28 - Aug. 24	Aug. 30	WC, EC, SW	Langlade, Grant, Marathon
Barley, spring	April 5	April 30	Aug. 1	Aug. 5 - Aug. 15	Aug. 20	NC, NW	Marathon, Manitowoc, Clark,
Winter wheat	Sept. 30	Oct. 15	July 17	July 21 - Aug. 11	Aug. 19	EC, SC, SE	Manitowoc, Fond du Lac, Dane
Potatoes	Mar. 25	May 5	July 20	Aug. 15 - Oct. 1	Oct. 10	C, NE	Portage, Waushara, Adams
Alfalfa hay			May 20		Oct. 10	SW, WC	Grant, Marathon, Iowa
All other hay			May 27		Sept. 15	NC, NW	Marathon, Clark, Rusk
<b>VEGETABLES</b>							
Carrots for processing	April 25	June 15	Aug. 15	Sept. 1 - Oct. 31	Nov. 15	C, EC	Waushara, Manitowoc, Portage
Snap beans for processing	May 1	July 10	July 10	July 15 - Sept. 15	Sept. 30	C	Portage, Adams, Waushara
Sweet corn for processing	April 1	July 1	Aug. 1	Aug. 15 - Sept. 25	Oct. 15	C, EC	Portage, Waushara, Fond du Lac
Green peas for processing	April 15	June 10	June 20	July 1 - July 20	July 31	EC, C	Fond du Lac, Portage, Green Lake
Cucumbers for pickles	May 1	June 20	July 15	July 25 - Sept. 15	Oct. 15	C	Waupaca, Waushara, Portage

## CONVERSION FACTORS

- One quart of milk weighs 2.15 pounds
- One gallon of milk weighs 8.6 pounds
- 46.5 quarts of milk weighs 100 pounds.
- Specific gravity of milk at 60 degrees F is 1.032.

100 pounds of 4% milk will yield approximately:

10 pounds cheese and 90 pounds whey or  
5 pounds butter and 90 pounds skim milk or  
13 pounds dried whole and 1-1/4 pounds 40% cream

100 pounds skim milk will yield approximately:

16 pounds cottage cheese and 84 pounds whey or  
3 pounds casein and 94 pounds whey or  
9 pounds nonfat dry milk

100 pounds whey will yield approximately:

5 pounds lactose and  
1 pound protein and  
1/3 pound milkfat

To make one pound of:

Butter  
Whole milk cheese  
Evaporated milk  
Condensed milk  
Whole powdered milk  
Powdered cream  
Ice cream (1 gal.)

Requires:

21.2 pounds whole milk  
10.0 pounds whole milk  
2.1 pounds whole milk  
2.3 pounds whole milk  
7.4 pounds whole milk  
13.5 pounds whole milk  
12.0 pounds whole milk  
*(15 pounds when including butter and concentrated milks)*

Cottage cheese  
Nonfat dry milk

6.25 pounds skim milk  
11.0 pounds skim milk
