General Documentation
FY2005 Outpatient Hospital Observation Database

INTRODUCTION

This documentation manual consists of two sections, General Documentation and Technical Documentation. This documentation manual is for use with the Outpatient Hospital Observation Database for FY2005.

Section I. General Documentation

The General Documentation section includes background on the development of the FY2005 Outpatient Hospital Observation Database, and is intended to provide users with an understanding of the data quality issues connected with the data elements they may decide to examine. This section also contains hospital-reported discrepancies received in response to the data verification process, and supplementary information, including a table of data field names and descriptions, a list of Type A and Type B errors, and a list of hospitals within the database.

Section II. Technical Documentation

The Technical Documentation Section includes information on the fields calculated by the Division of Health Care Finance & Policy (DHCFP), and a data file summary section describing the data that is contained in the file.

For your reference, CD Specifications are listed in the following section to provide the necessary information to enable users to access files.

Regulations:

Copies of ***Regulation 114.1 CMR 17.00: Requirement for the Submission of Hospital Case Mix and Charge Data*** and ***Regulation 114.1 CMR 2.00: Disclosure of Hospital Case Mix and Charge Data*** may be obtained for a fee by faxing a request to the Division at (617) 727-7662, or by emailing a request to the Division at Public.Records@state.ma.us. The Regulations also may be found at the Division's web site: <http://www.mass.gov/dhcfp>.

Compact Disk (CD) File Specifications

1) Hardware Requirements

*CD ROM Device

*Hard Drive with 1.60 GB of space available

2) CD Contents

This CD contains the “Final/Full Year” 2005 Outpatient Hospital Observation Data Product. It contains two Microsoft Access database (MDB) files.

As an approved applicant, or its agent, you are reminded that you are bound by your application and confidentiality agreement to secure this data in a sufficient manner, so as to protect the confidentiality of the data subjects.

3) File Naming Conventions

OA05L#Q1

OA05L#Q2

OA05L#Q3

OA05L#Q4

Where ‘#’ stands for the level of data requested.

4) **2005 Outpatient Observation Record Counts:**

For Hospital Year 2005 the number of outpatient observation stays collected from Massachusetts hospitals for Quarters 1 – 4 totaled 128,812. The distribution by quarter is as follows:

Quarter 1 = 32,630	(N = 72 Hospitals Reporting)
Quarter 2 = 32,386	(N = 72 Hospitals Reporting)
Quarter 3 = 32,450	(N = 72 Hospitals Reporting)
Quarter 4 = 31,346	(N = 72 Hospitals Reporting)

SECTION I. GENERAL DOCUMENTATION

PART A. BACKGROUND INFORMATION

1. General Documentation Overview
2. Quarterly Reporting Periods
3. Development of the FY05 OOA Database
& Description of the Six Data Levels

General Documentation
FY2005 Outpatient Hospital Observation Database

PART A. BACKGROUND INFORMATION

1. GENERAL DOCUMENTATION OVERVIEW

The General Documentation consists of six sections.

PART A. BACKGROUND INFORMATION: Provides a general documentation overview, description of quarterly reporting periods, and information on the development of the FY2005 Outpatient Hospital Observation Database.

PART B. DATA: Describes the basic data quality standards as contained in Regulation 114.1 CMR 17.00: Requirement for the Submission of Hospital Case Mix and Charge Data, some general definitions, general data caveats, and information on specific data elements. To ensure that the database is as accurate as possible, the Division strongly encourages hospitals to verify the accuracy of their data as it appears on the Outpatient Hospital Observation Database Verification Report, or to indicate that the hospital found discrepancies in its data. If a hospital finds data discrepancies, the DHCFP requests that the hospital submit written corrections that provide an accurate profile of that hospital's observation stays. Part C of the General Documentation details hospital responses.

PART C. HOSPITAL RESPONSES: Details hospital responses received as a result of the data verification process. From this section, users can also learn which hospitals did not verify their data. This section contains the following lists and charts:

1. Summary of Hospital's FY2005 OOA Verification Report Responses
2. List of Error Categories
3. Summary of Reported Discrepancies by Category
4. Index of Hospitals Reporting Discrepancies
5. Individual Hospital Discrepancy Documentation

PART D. CAUTIONARY USE HOSPITALS: Lists the hospitals for which the Division did not receive four (4) quarters of acceptable Outpatient Hospital Observation Data, as specified under Regulation 114.1 CMR 17.00.

PART E. HOSPITALS SUBMITTING DATA: Lists all hospitals submitting OOA data for FY2005 and those that failed to provide data. Also lists hospital discharge and charge totals by quarter for hospitals submitting data.

PART F. SUPPLEMENTARY INFORMATION: Provides Supplements I through VI as listed in the Table of Contents. Contains data element names, descriptions, and types of errors, hospital addresses, and identification numbers.

General Documentation
FY2005 Outpatient Hospital Observation Database

PART A. BACKGROUND INFORMATION

2. Definition of Quarterly Reporting Periods

All Massachusetts acute care hospitals are required to file data which describes the case mix of their patients as well as the charges for services provided to their patients in accordance with Regulation 114.1 CMR 17.00. Hospitals report data to the Division on a quarterly basis. For the 2005 period, these quarterly reporting intervals were as follows:

Quarter 1: October 1, 2004 – December 31, 2004

Quarter 2: January 1, 2005 – March 31, 2005

Quarter 3: April 1, 2005 – June 30, 2005

Quarter 4: July 1, 2005 – September 30, 2005

PART A. BACKGROUND INFORMATION

3. Development of the FY2005 Outpatient Hospital Observation Database

The Massachusetts Division of Health Care Finance and Policy began collecting Outpatient Observation Data in July 1997. The Division's collection of Outpatient Observation Data was in response to increasing migration of hospital care to the outpatient observation setting from the tradition inpatient setting. Outpatient Observation patients are observed, evaluated, and treated, if necessary, before they are safely discharged from the hospital.

The Outpatient Observation Data includes patients who receive outpatient observation services and are not admitted to the hospital. Outpatient Observation services is defined generally for reporting purposes in the Case Mix Regulation 114.1 CMR 17.02 as:

Observation services are those furnished on a hospital's premises which are reasonable and necessary to further evaluate the patient's condition and provide treatment to determine the need for possible admission to the hospital. These services include the use of a bed and periodic monitoring by a hospital's physician, nursing, and other staff.

PART A. BACKGROUND INFORMATION

3. Development of the FY2005 Outpatient Hospital Observation Database

Description of the Data Levels I - VI

Six Fiscal Year 2005 data levels have been created to correspond to the levels in *Regulation 114.5 CMR 2.00; "Disclosure of Hospital Case Mix and Charge Data"*. Higher levels contain an increasing number of the data elements defined as "Deniable Data Elements" in Regulation 114.5 CMR 2.00. The deniable data elements include: the Unique Health Identification Number (UHIN, which is the encrypted patient social security number), the patient medical record number, hospital billing number, Mother's UHIN, date of birth, beginning and ending dates of service, the Unique Physician Number (UPN, which is the encrypted Massachusetts Board of Registration in Medicine License Number), and procedure dates.

The six levels include:

- | | |
|------------------|---|
| LEVEL I | Contains all case mix data elements, except the deniable data elements |
| LEVEL II | Contains all Level I data elements, plus the UPN |
| LEVEL III | Contains all Level I data elements, plus the patient UHIN, the mother's UHIN, an observation sequence number for each UHIN observation record, and may include the number of days between each subsequent observation stay for each UHIN number. |
| LEVEL IV | Contains all Level I data elements, plus the patient UHIN, the mother's UHIN, the UPN, an observation sequence number for each UHIN observation record, and may include the number of days between each subsequent observation stay for each UHIN number. |
| LEVEL V | Contains all Level IV data elements, plus the patient's beginning service date, and ending service date and procedure dates. |
| LEVEL VI | Contains all of the deniable data elements. |

General Documentation
FY2005 Outpatient Hospital Observation Database

SECTION I. GENERAL DOCUMENTATION

PART B. DATA

1. OOA Data Quality Standards
2. General Definitions
3. General Data Caveats
4. Specific OOA Data Elements
5. DHCFP Calculated Fields

PART B. DATA

1. OUPATIENT OBSERVATION DATA QUALITY STANDARDS

The Regulation requires hospitals to submit outpatient observation data 75 days after the close of each quarter. The quarterly data is then edited for compliance with regulatory requirements, as specified in *Regulation 114.1 CMR 17.08: Outpatient Observation Data Specifications*.

The Regulation specifies a one percent error rate, based on the presence of type A and type B errors as follows:

Type A: One error per outpatient observation stays causes rejection of discharge.

Type B: Two errors per outpatient observation stay causes rejection of discharge.

If one percent or more of the discharges are rejected, then the entire data submission is rejected by the Division, and the hospital is informed that the submission failed the edit process. These edits primarily check for valid codes, correct formatting, and the presence of required data elements. Please see listing of data elements categorized by error type in the Supplement Section.

Each hospital receives a quarterly error report displaying invalid outpatient observation stay information. Quarterly data which does not meet the one percent compliance standard must be resubmitted by the individual hospital until the standard is met.

The Division strives to include data that has passed the one percent compliance standard in the data files we release to the public. When this is not possible, we include data which did not meet the 1% standard (i.e. failed the edits). Submissions which have failed are referred to as **Cautionary Submissions**. Observation stays within submissions that have failed the edit process are assigned a special flag which indicates that the submission failed.

Please see the Cautionary Use Data section for further technical details.

PART B. DATA

1. OUPATIENT OBSERVATION DATA QUALITY STANDARDS - *Continued*

Data Verification Process

The year-end Outpatient Observation Data verification process is intended to present the hospitals with a profile of their individual data as retained by the Division. The purpose of this process is to function as a quality control measure for hospitals to review the data they have provided to the Division of Health Care Finance and Policy.

Hospitals have an opportunity to review their data each year. The Division produces a Profile Report for the hospital to review that contains a series of frequency distribution tables covering selected data elements. Examples of these tables include number of observation patients by month, average hours of service, charge summary, and the top diagnoses and procedures. A complete listing of all tables is shown below.

Profile Report Distribution Tables

• Observation Patient by Month	• Patient Gender Distribution
• Average Hours of Service	• Patient Race Distribution
• Charge Summary	• Top 20 Zip Codes of Patient Origin
• Observation Type Distribution	• Top 10 Primary Diagnoses, Average Charge, and Average Hours of Service
• Originating Referral / Transferring Source	• Top 10 Principal Procedures
• Secondary Referral / Transferring Source	• Top 10 Primary Payers
• Other Primary Caregivers	• Top 10 Secondary Payers
• Departure Status Summary	

PART B. DATA

1. OUPATIENT OBSERVATION DATA QUALITY STANDARDS - *Continued*

Data Verification Process - *Continued*

After reviewing each Profile Report, hospitals are asked to file a response form which provides the Division with verification that the report has been reviewed. The **Profile Report Response Form** provides each hospital with two alternatives for their reply:

Hospital Agrees (also known as an “A” response): By checking this category, a hospital indicates its agreement that the data appearing on the Profile Report is accurate and that it represents the hospital’s outpatient observation patient profile.

Hospital Discrepancies Noted (also known as a “B” response): By checking this category, a hospital indicates that the data on the report is accurate except for discrepancies noted.

If any discrepancies exist (i.e. a “B” response), the Division requests that hospitals provide a written explanation of the discrepancies, which will be included in this Outpatient Observation Documentation manual. A listing of the Profile Report Error Categories is shown below:

Profile Report Error Categories:

The discrepancy categories which hospitals may report on the Profile Report Verification Response form are as follows:

Patients by Month	Other Primary Caregivers	Diagnoses
Hours of Service	Departure Status	Procedures
Charge Summary	Age	Primary Payers
Observation Type Distribution	Sex	Secondary Payers
Originating Referring / Transfer Source	Race	CPT Codes
Secondary Referring / Transfer Source	Zip Codes	

Hospitals are strongly encouraged by the Division to review their Profile Report for inaccuracies and make necessary corrections so that subsequent quarters of data will be accurate.

General Documentation
FY2005 Outpatient Hospital Observation Database

PART B. DATA

2. GENERAL DEFINITIONS

Before providing a description of specific data elements, the following basic definition should be noted.

Outpatient Observation Services:

The Outpatient Observation Data includes patients who receive outpatient observation services and are not admitted to the hospital. Outpatient Observation services is defined generally for reporting purposes in the Case Mix Regulation 114.1 CMR 17.02 as:

Observation services are those furnished on a hospital's premises which are reasonable and necessary to further evaluate the patient's condition and provide treatment to determine the need for possible admission to the hospital. These services include the use of a bed and periodic monitoring by a hospital's physician, nursing, and other staff.

General Documentation
FY2005 Outpatient Hospital Observation Database

PART B. DATA

3. GENERAL DATA CAVEATS

Information may not be entirely consistent from hospital to hospital due to differences in:

- Collection and Verification of patient supplied information at the time of arrival;
- Medical Record Coding, consistency, and/or completeness;
- Extent of hospital data processing capabilities;
- Extent of hospital data processing systems;
- Varying degrees of commitment to quality of data;
- Non-comparability of data collection and reporting

4. DHCFP CALCULATED FIELDS

Analysis of the UHIN data by the Division has turned up problems with some of the reported data for the inpatient and outpatient observation stays databases. For a small number of hospitals, little or no UHIN data exists as these hospitals failed to report patients' social security numbers (SSN). Other hospitals reported the same SSN repeatedly resulting in numerous visits for one UHIN. In other cases, the demographic information (age, sex, etc.) was not consistent when a match did exist with the UHIN. Some explanations for this include assignment of a mother's SSN to her infant or assignment of a spouse's SSN to a patient. This demographic analysis shows a probable error rate in the range of 2% - 10%.

In the past, the DHCFP has found that, on average, 91% of the SSNs submitted are valid when edited for compliance with rules issued by the Social Security Administration. Staff continually monitors the encryption process to ensure that duplicate UHINs are not inappropriately generated, and that recurring SSNs consistently encrypt to the same UHIN.

Only valid SSNs are encrypted to a UHIN. It is valid for hospitals to report that the SSN is unknown. In these cases, the UHIN appears as '000000001'.

Invalid SSNs are assigned 7 or 8 dashes and an error code. The list of error codes is as follows:

ssn_empty = 1
ssn_notninechars = 2
ssn_allcharsequal = 3
ssn_firstthreecharszero = 4
ssn_midtwocharszero = 5
ssn_lastfourcharszero = 6
ssn_notnumeric = 7
ssn_rangeinvalid = 8
ssn_erroroccurred = 9
ssn_encrypterror = 10

****Based on these findings, the DHCFP strongly suggests that users perform qualitative checks on the data prior to drawing conclusions about that data.**

Nantucket Cottage	27

PART C. HOSPITAL RESPONSES

5. INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Caritas Norwood Hospital

Caritas Norwood reported discrepancies in the area of Patients by Month. The hospital stated that it had 23 more observation patients than was indicated on the Division's report. The 23 patients appeared to be for the most part Same Day Surgery patients that were changed to observation for one reason or another. The true OP Observation number for Caritas Norwood Hospital for FY 05 was 1,097.

PART C. HOSPITAL RESPONSES

5. INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Nantucket Cottage Hospital

Nantucket Cottage Hospital reported discrepancies in the area of Observation Type Distribution. The hospital's review of the Observation FY05 data reflected only 1 case difference when compared with the DHCF&P outcomes. Please see the following variance tables and overall summary.

Hospital Outpatient Observation Profile Report – FY05 Verification

1. The #s – DHCF&P (Division of Health Care Finance & Policy) column = the reported cases.
2. The #s – NCH column = currently compiled data for the FY verification totals.
3. The #s – Variance column is reported as a (-) negative where NCH actual is a higher value than DHCF&P reported. Conversely, (+) positive variance is indicated where the DHCF&P reported value is higher than the NCH current data #s. (?) no comparison possible not reported.

Nantucket Cottage Hospital - *Continued*

- **Originating Referral/ Transferring Source limited to codes:** #1 Direct Physician Referral, #7 Outside Hospital ER transfers. Codes indicating the source referring or transferring the patient to the hospital. Primary source of admit must be the originating referral source causing the patient to enter the hospital or the transferring facility causing the patient to enter the hospital. Code #7 is used when the originating source is undetermined. “Transferred from within hospital ED should only be a secondary designation. Reference attachment for the Admission Source Dictionary.

- **Departure Status Summary:** The number of Observation patients transferred = 31. Verification of the accuracy of the data as follows:

- TGEN (Transfer to Another General Acute Care Hospital): 19 patients
- THHS (Transfer to Home Health Services): 2 patients
- TPSY (Transfer to Psych Hospital): 6 patients
- TSNF (Transfer to Skilled Nursing Facility): 3 patients
- TOTL (Transfer to Other type of Facility) 1 patients
- TCDF (Transfer to Chemical Dependency Facility) 1 patients
- AMA (Against Medical Advice) 2 patients

Total = 32 patients

- **Comparative Data FY00 - FY05:**

	<u>FY00</u>	<u>FY01</u>	<u>FY02</u>	<u>FY03</u>	<u>FY04</u>	<u>FY05</u>
Total Observation Patients:	240	223	236	242	250	267
Average Length of Stay (in hours):	-	22.52	16.33	19.47	18.45	18.57
Total Patients Transferred:	39	47	56	33	42	32
Admit to Hospital category:	-	-	-	-	-	-
% Patients classified thru ED:	-	79.2	80	78.9	79.6	78.7

Technical Documentation
FY2005 Outpatient Hospital Observation Database

SECTION I. GENERAL DOCUMENTATION

**PART D. CAUTIONARY USE HOSPITALS
FY2005**

Technical Documentation
FY2005 Outpatient Hospital Observation Database

PART D. CAUTIONARY USE HOSPITALS

The Outpatient Observation data files contain the most recent active data from each hospital. Active data includes submissions from hospitals that have “passed” the Division’s edits, and also includes submissions that have “failed”. Failing the edit process would mean that 1% or more of the observation stays did not pass the edit process. We consider data that did not pass the edit process to be “cautionary use” data.

We have included on each file a field called SubmissionPassed. This field serves as a flag and indicates whether the quarterly submission passed or failed the edit process.

If a submission passed the edit process, the SubmissionPassed field for all observation stays within that submission are assigned a value of -1.

If a submission failed the edit process, the SubmissionPassed field for all observation stays within that submission are assigned a value of 0.

PART E. SUPPLEMENTARY INFORMATION

Supplement I.

**Table of Outpatient Observation Data Field Names,
Field Descriptions, and Error Types (A or B)**

Supplement II.

**Hospital Addresses, DPH ID, Org ID & Service Site
Numbers**

Supplement III.

Alphabetical Source of Payment List

Supplement IV.

Numerical Source of Payment List

Supplement V.

**Mergers, Name Changes, Closures, Conversions &
Non-Acute Care Hospitals**

Technical Documentation
 FY2005 Outpatient Hospital Observation Database

Supplement I. Data Element Field Names, Descriptions, and Error Categories

The following are the required data elements that hospitals must report to the Division in accordance with the Case Mix Regulation 114.1 CMR 17.00. We have also included additional fields created by the Division. *Newly added for FY2002* was an **ED indicator** that went into effect October 1, 2001. The flag indicates whether the patient was admitted to the outpatient observation stay from the hospital's emergency department.

In addition to the field names, the data description and error category for each field is listed below:

	Field Name:	Short Description:	Error Category:
1	Hos_ID	Hospital DPH number	A
2	MultiSiteN	Hospital's designated number for multiple sites merged under one DPH number	
3	Pt_ID	Unique Health Identification Number	A
4	MR_N	Patient's Medical Record number	A
5	Acct_N	Hospital billing number for the patient	A
6	MOSS	Mother's social security number for infants up to 1 year old	B
7	MCD_ID	Medicaid Claim Certificate Number	A
8	DOB	Patient's date of birth	A
9	Sex	Patient's sex	A
10	Race	Patient's race	B
11	Zip_Code	Patient's zip code	B

Technical Documentation

SECTION II. TECHNICAL DOCUMENTATION

PART A. CALCULATED FIELD DOCUMENTATION

- 1. Age Calculation**
- 2. Observation Sequence Number Calculation**
- 3. No. of Days Between Observation Stays Calculation**

PART A. CALCULATED FIELD DOCUMENTATION

1. Age Calculation

Brief Description:

AgeOfPatient is calculated using the DateDiff Function in Access, which subtracts the date of birth (DOB) from the End_Date. Age is calculated to the nearest year (the remainder is dropped) if patient is at least 1 year old. The AgeUnits field is assigned a value of 'YEARS'. Age is calculated to the nearest week (the remainder is dropped) if a patient is less than 1 year old. The AgeUnits field is assigned a value of 'WEEKS'.

If the observation did not pass the edits for any reason the age is not calculated and the AgeOfPatient field is set to zero and the AgeUnits field is left blank.

Detailed Description:

1. If the observation passed the edits then the DateDiff function is used to determine the age in weeks of the patient by subtracting the Date of Birth from the End of Service Date.
2. If the age in weeks is greater than 51 then the DateDiff function is used to determine the age in years of the patient by subtracting the Date of Birth from the End of Service Date and the AgeUnits is set to "Years".
3. If the age in weeks is less than or equal to 51 then the DateDiff function is used to determine the age in weeks of the patient by subtracting the Date of Birth from the End of Service Date and the AgeUnits is set to "Weeks".
4. If the observation did not pass the edits then the AgeOfPatient is set to zero and the AgeUnits field is left blank.

PART A. CALCULATED FIELD DOCUMENTATION

2. Observation Sequence Number Calculation

Brief Description:

The file is sorted by PT_ID (Unique Patient ID also known as the UHIN) and End Date. The Observation Sequence Number (ObsSeqNo) is then calculated by incrementing a counter for each of the PT_ID's observation stays.

If the observation did not pass the edits for any reason the Observation Sequence Number is not calculated and the ObsSeqNo field is set to zero.

Detailed Description:

1. The file is sorted by PT_ID (Unique Patient ID also known as the UHIN) and End_Date.
2. The sequence number is calculated by incrementing a counter from 1 to nnn, where a sequence number of 1 indicates the first observation stay for a PT_ID and nnn indicates the last observation stay for the PT_ID.
3. If the observation did not pass the edits then the ObsSeqNo is set to zero.

PART A. CALCULATED FIELD DOCUMENTATION

3. Number of Days Between Observation Stays Calculation

Brief Description:

The file is sorted by PT_ID (Unique Patient ID also known as the UHIN) and End Date. For PT_IDs with 2 or more observation stays the Number of Days Between Observation Stays (NoofDaysBtwObs) is calculated using the DateDiff Function in Access which subtracts the previous observation end date from the current End_Date.

If the observation did not pass the edits for any reason the Number of Days Between Observation Stays is not calculated and the Noof DaysBtwObs field is set to zero.

Detailed Description:

1. The file is sorted by PT_ID (Unique Patient ID also known as the UHIN) and End_Date.
2. If this is the first occurrence of a PT_ID the Number of Days Between Observation Stays is set to zero.
3. If a second occurrence of a PT_ID is found then the Number of Days Between Observation Stays (NoofDaysBtwObs) is calculated by using the DateDiff Function in Access, which subtracts the previous observation end date from the current End_Date.
4. Step 3 is repeated for all subsequent observation stays until the PT_ID changes.
5. If the observation did not pass the edits then the NoofDaysBtwObs is set to zero.

PART B. DATA FILE SUMMARY

2. Outpatient Observation Data Codes

The following are the data codes for the required data elements that hospitals must report to the Division in accordance with Case Mix Regulation 114.1 CMR 17.00. We have also included data codes for the additional fields created by the Division. Each recipient for outpatient observation data has been granted approval by the Division to receive a certain level of data. Please refer to Section III for a description of Data Levels I – VI and to Section VII, Appendix D to review the specific data elements contained in your data files. Please note that the higher levels contain an increasing number of Deniable Data Elements.

Field Name	Description
Hos_ID	Hospital Department of Public Health number
Multi_SiteN	Optional field for a hospital's determined number used to distinguish multiple sites that fall under one DPH number
Pt_ID	Unique Health Identification Number (UHIN)
MR_N	Patient's hospital medical record number
Acct_N	Hospital's billing number for the patient
MOSS	Mother's UHIN for infants up to one year old or less
MCD_ID	Medicaid Claim Certificate Number
DOB	Birth month, day, and year
Sex	1 = male; 2 = female; 3 = unknown
Race	1 = White; 2 = Black; 3=Asian; 4 = Hispanic; 5 = Native American; 6 = Other; 9 = Unknown
Zip_Code	Patient's residential 5-digit zip code
Ext_Zcode	Patient's residential 4 digit zip code extension
Beg_Date	Month, day, and year when service begins
End_Date	Month, day, and year when service ends
Obs_Time	Initial Observation encounter time. The time the patient became an Observation Stay patient.
Ser_Unit	The amount of time the patient has spent as an Observation Stay patient. The unit of service for Observation Stay is hours.

Technical Documentation
 FY2005 Outpatient Hospital Observation Database

PART B. DATA FILE SUMMARY

2. Outpatient Observation Data Codes

Field Description	Description
Obs_Type	Observation Visit Status: 1 = Emergency, 2 = Urgent, 3 = Elective, 4 = Newborn, 5 = Information Not Available
Obs_1Srce	<p>Originating Observation Visit Source:</p> <p>1 = Direct Physician Referral, 2 = Within Hospital Clinic Referral 3 = Direct Health Plan Referral, 4 = Transfer from Acute Care Hospital, 5 = Transfer from SNF, 6 = Transfer from ICF, 7 = Outside Hospital ER Transfer, 8 = Court/Law Enforcement, 9 = Other, 0 = Information Not Available, L = Outside Hospital Clinic Referral, M = Walk-In/Self- Referral, R = Inside Hospital ER Transfer, T = Transfer from another Institution's SDS, W = Extramural Birth, Y = Within Hospital SDS Transfer</p> <p>Example: If a patient is transferred from a SNF to the hospital's clinic and then becomes an Observation Stay status, the Originating Observation Source would be "5 – Transfer from SNF".</p>
Obs_2Srce	<p>Secondary Observation Visit Source:</p> <p>1 = Direct Physician Referral, 2 = Within Hospital Clinic Referral 3 = Direct Health Plan Referral, 4 = Transfer from Acute Care Hospital, 5 = Transfer from SNF, 6 = Transfer from ICF, 7 = Outside Hospital ER Transfer, 8 = Court/Law Enforcement, 9 = Other, 0 = Information Not Available, L = Outside Hospital Clinic Referral, M = Walk-In/Self- Referral, R = Inside Hospital ER Transfer, T = Transfer from another Institution's SDS, W = Extramural Birth, Y = Within Hospital SDS Transfer</p> <p>Example: If a patient is transferred from a SNF to the hospital's clinic and then becomes an Observation Stay status, the Secondary Observation Source would be "2 – Within Hospital Clinic Transfer".</p>
Dep_Stat	<p>Patient Disposition (Departure Status):</p> <p>1 = Routine, 2 = Adm to Hospital, 3 = Transferred, 4 = AMA, 5 = Expired</p>
Payr_Pri	Primary Source of Payment. Please see Appendix H for Alphabetical Source of Payment List & Appendix I for Numerical Source of Payment List
Payr_Sec	Secondary Source of Payment. Please see Appendix H for Alphabetical Source of Payment List & Appendix I for Numerical Source of Payment List
Charges	Grand total of all charges associated with the patient's observation stay.

Technical Documentation
 FY2005 Outpatient Hospital Observation Database

PART B. DATA FILE SUMMARY

2. Outpatient Observation Data Codes

Field Description	Description
Surgeon	Unique Physician Number (UPN), or “DENSG” = Dental Surgeon, “PODTR” = Podiatrist or “OTHER” = for situations where no permanent physician license number is assigned or if a limited license is assigned, or “MIDWF” = Midwife, Or ----- = Invalid
