

Round 2 Management Action Workshops - Community Application

Workshop Participant Comment Form

A management action is a specific structural or nonstructural strategy, action, or tactic that contributes to the Central Valley Flood Protection Plan (CVFPP) goals and addresses identified flood management problems in the Systemwide Planning Area, including any identified deficiencies in the State Plan of Flood Control (refer to *CVFPP Interim Progress Summary No. 1*). Management actions may range from potential policy or institutional changes, to recommendations for operational and physical changes to the flood management system. Management actions may address one or more CVFPP goals and are the “building blocks” for regional solutions and eventually systemwide solutions.

An initial set of management actions was developed by consolidating a large number of compiled actions and recommendations from published studies and reports, and input from Regional Conditions and Topic Work Groups during CVFPP Phase 1 activities. After a preliminary evaluation of the environmental, economic, technical, and social considerations of the management actions, category-based public workshops were held (also referred to as Round 1 workshops) to gather public input and further refine these actions.

Community application workshops, which are part of Round 2 workshops, focus on determining how management action categories apply to specific community settings including small communities, rural/agricultural areas, and urban areas. For information on these community settings and Round 2 Workshops in general, please refer to the *Attendee's Guide to Phase 2 Workshops* available at www.water.ca.gov/cvfmp/meetings. Click on “Phase 2: Management Actions” and select “Round 2 Management Actions Workshops” from the drop-down menu.

To provide detailed written comments on how management actions apply to a specific community setting, use this fillable PDF *Comments Form*. The format for this *Comments Form* matches that of the *Draft Workshop Worksheet*. A separate draft worksheet has been completed for *Small Communities, Rural/Agricultural Areas, and Urban Areas*. For a description of the format please refer to the *Community Applications Worksheet Guide*. Information about management action categories and subcategories, and initial draft management actions are documented in *Categories of Management Actions for Round 2 Workshop Discussions*. These documents are all available at www.water.ca.gov/cvfmp/.

Comment Form Instructions

- A separate *Comments Form* should be used for each community setting.
- Comments can be provided on all or specific sections of the form.
- Commenters' contact information is required to allow for follow-up by staff for clarification purposes, if needed.
- Completed *Comments Form(s)* and related questions should be e-mailed to Alexandra Tollette (Alexandra.Tollette@us.mwhglobal.com).
- Due to schedule constraints, all comments must be submitted within 2 business days of a given workshop (e.g., Small Communities will be held on August 24, 2010, so all comments must be submitted by 5pm on August 26, 2010). The full Round 2 Workshops schedule is available at the web address listed above.
