

Regional ESCO 2012 DLTA Project: Letter of Interest

To Whom It May Concern:

On behalf of my municipality, _____, I would like to express interest in participating in MAPC's 2012 DLTA project for the regional procurement of an Energy Services Company (ESCO).

- I understand that to participate in this procurement, I will need to submit an inventory of municipally-owned facilities, their square footage, and at least one year of historic energy consumption for each facility. If this information has not previously been compiled, I will work with MAPC staff in a timely matter to put together this facility and utility data.

I understand that a local match, while not required, is encouraged to demonstrate commitment to these projects. I will determine my municipality's ability to contribute both in terms of funding and staff time, and get approval for participation in these projects with the relevant elected officials, boards, or other entities in my municipality.

By signing this letter, I acknowledge that MAPC will regard my municipality as an interested DLTA participant unless otherwise notified. This letter is not a binding agreement.

Sincerely,
