Minnesota e-Health Summit

Audience

Professionals working in clinics, hospitals, long-term care, public health, health systems, managed care and information systems, along with others interested in emerging health information technology (HIT) will want to participate in the e-Health Summit.

Purpose

To inform, educate and provide participants with a call to action to accelerate the use of Health Information Technology to improve health care quality, increase patient safety, reduce health care costs, and enable individuals and communities to make the best possible health decisions.

Objectives

Upon completion of this program, each participant will be able to:

- Describe the United States Government's strategic framework for improving healthcare through health information technology (HIT).
- Discuss the importance of collaboration when implementing HIT strategies.
- Describe lessons learned by other states already using HIT.
- Discuss the current status of the Minnesota e-Health Initiative.
- Identify HIT strategies already put into practice in Minnesota.
- Describe the future direction of HIT in Minnesota as well as action required to achieve it.
