## Healthy, Wealthy, \& Wise

## Learning to improve financial health, increase wealth, and make wise consumer choices

## Budget Basics

Some families seem to have a knack for making ends meet. The difference is not how much money they have but how well they manage their resources. These families have learned the value of planning and controlling expenses by using a spending plan.

In this issue, you will learn to make a monthly spending plan. Monthly expenses that stay about the same each month are easy to remember. You will also learn to plan for nonmonthly periodic expenses that can be budget-busters if you don't have money set aside for them.

Most "unexpected" expenses are things we've "neglected" in our spending plan. What are some expenses that always seem to cause stress for your family?

The next sections can help you decide if it's the little things or the big things that cause the most trouble. You may get a few ideas for ways to plan for or control them.

## Little things add up

Does your money seem to just disappear? Cutting out a few daily expenses can do magic! Figure how much these "little things" cost each year:

- Eating out $\$ 5$ per day $=\$ 150$ per month $\times 12$ or $\$$ $\qquad$ per year.
- Cola $\$ 1$ per day $=\$ 30$ per month $x 12$ or $\$$ $\qquad$ per year.
- Movie rental $\$ 5$ per week x $52=\$$ $\qquad$ per year.
- Cigarettes $\$ 4$ per day x $365=\$$ $\qquad$ per year.
- Coffee $\$ 2$ per day x $365=\$$ $\qquad$ per year.
- Snacks $\$ 1$ per day x $365=\$$ $\qquad$ per year.
- Alcohol \$20 per week x $52=\$$ $\qquad$ per year.

All of these together add up to $\$ 6,015$ per year.
What else could you do with nearly $\$ 500$ per month?

Use these words to complete the statements and increase your knowledge about spending plans.

| debt | fixed | income | periodic |
| :--- | :--- | :--- | :--- |
| expenses | flexible | needs | written |

1. A spending plan helps families to live within their $\qquad$ .
2. One of the best ways to stay on track with a spending plan is to stay out of
$\qquad$ .
3. Two major parts of a spending plan are income and $\qquad$ .
4. Before developing a spending plan, it is a good idea to keep a record of your income and expenses for two or three months. This helps you establish a more realistic and accurate plan you can stick with.
5. Expenses that stay the same each month, like housing, car payments, or other monthly installment credit payments are called $\qquad$ expenses. These are the easiest payments to remember and the hardest to change. Write them on your spending plan first.
6. Expenses that change from month to month are called $\qquad$ expenses. These may include food, clothing, gasoline, personal care, and most daily expenses. The envelope method is one way to control these. Write how much you can afford on your spending plan and put that amount in an envelope labeled for that category. When the envelope is empty, it's time to stop spending.
7. Irregular or $\qquad$ expenses that don't occur every month are the hardest to remember. To avoid budget bumps and bulges, plan for these annual expenses.
8. Separating wants from $\qquad$ , or what is absolutely necessary, is another important part of budgeting. Include necessities in your budget first, and make sure to set aside the money to cover those that are priorities. Some people who fail to plan mistakenly believe they have money to spend on what they want when they get a paycheck. Those who have carefully planned realize that most of their income is already designated for other expenses before it arrives.

## Schedule Nonmonthly Expenses

Most spending plans are based on monthly income and expenses. Some expenses do not occur monthly but rather periodically throughout the year. When a major nonmonthly expense such as car insurance comes due, it may be difficult to pay the entire amount out of one month's income. Planning ahead for major expenses eliminates this problem. Use the form below to help you calculate how much to set aside each month so you can pay major bills when they are due. In other words, break large payments down into monthly payments to prevent your budget from being blown! An example is shown.

| Item | Jan | Feb | Mar | Apr | May | June | July | Aug | Sep | Oct | Nov | Dec | Yearly cost | Average monthly amount |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
