Guardrail Inspection

Workshop Description

The workshop will consist of classroom discussion covering the general aspects and details associated with installing and maintaining roadside guardrails. Topics will include:

- History: The evolution of roadside safety hardware
- Criteria: Considerations involved with guardrail design and the ensuing requirements
- Liability: What are the legal requirements related to installing and maintaining guardrails?
- Roadside design: How guardrails fit into the design of a road
- Safety Hardware: What is safety hardware and how do you choose among the options?
- Preparation: How to prepare for a guardrail installation or maintenance operation
- Traffic Control: What traffic control is necessary for guardrail work?
- Installation: How is guardrail installed and why?
- Maintenance: How and when is guardrail maintained?
- Common Problems: If it can go wrong, it will... Murphy

Roads Scholar Program

"Guardrail Inspection" is NOT a part of the Roads Scholar Program..

Instructor

The instructor is Dennis Coyle. Dennis has been involved in the design of highways for over 25 years. He is nationally recognized as an expert in roadside design and the associated safety hardware and currently provides the annual training on this subject for the Design Division at the Nevada Department of Transportation. As the Standards and Manuals Supervisor for NDOT, Dennis has evaluated testing and in-service performance of safety hardware for many years and oversees the department's design standards compliance effort. He is also an ATSSA certified traffic control supervisor and has lectured on this subject at the state and national level. Dennis is currently revising NDOT's safety hardware selection procedures and maintenance requirements.

Location/Time

April 20, 2009—Tonopah, NV
