

## Course Description

AWHONN's Advanced Fetal Monitoring Course (AFMC), designed for the *experienced clinician*, focuses on the application of advanced concepts and knowledge of fetal monitoring as they apply to complex maternal-fetal case scenarios. The course builds on knowledge gained from the AWHONN Intermediate Fetal Monitoring Course (IFMC).

## Learning Objectives

**At the conclusion of this workshop, the participant should be able to:**

- Identify physiologic principles underlying fetal heart monitoring.
- Describe physiologic principles of maternal and fetal oxygen transfer and acid-base balance.
- Describe concepts in antenatal testing, including analysis and interpretation of biophysical profiles and complex antenatal fetal heart monitoring tracings.
- Relate physiologic principles to the goals and interventions of antenatal testing.
- Evaluate interventions for patients undergoing antenatal testing.
- Analyze fetal cardiac arrhythmia patterns and describe outcomes associated with these patterns.
- Analyze complex fetal heart monitoring patterns utilizing current NICHD/ACOG FHM terminology and categories.
- Apply perinatal risk management principles, communication techniques, and documentation strategies related to complex and challenging patient care scenarios.

## Course Requirements

In preparation for the course, participants must read AWHONN's *Fetal Heart Monitoring Principles and Practices, 4th Ed.* which will be provided upon registration.

## Schedule

### Flagstaff Medical Center

*Class time 8:00 a.m. - 5:00 p.m.*
