

**LPCH Pediatric Resident M&M Submission Form**

Resident submitting proposal: \_\_\_\_\_

Patient MR number: \_\_\_\_\_

Date of incident (approximation is OK if specific date is not available):  
\_\_\_\_\_

Service patient was on or location of patient at time of incident:  
\_\_\_\_\_

Attending physician at the time of incident: \_\_\_\_\_

Other services involved and Attendings (if applicable): \_\_\_\_\_  
\_\_\_\_\_

Other residents involved in case: \_\_\_\_\_

Who do you think would be the most appropriate person to present this case?  
\_\_\_\_\_

Incident Description:

List the problems or questions that arose from this incident:

What is the specific question to be addressed in the M&M session? Please specify whether you believe a medical knowledge issue or a systems issue was primarily responsible:

Are there other individuals you think should be invited to the presentation of this case not otherwise connected with the hospital services listed above? If yes, please specify:

If not already completed, please strongly consider entering this case in Quantros, which is LPCH's event reporting system at <https://qxpert.quantros.com/lpch/>  
If you have any questions, please contact the Chiefs or refer to the tutorial at [https://qxpert.quantros.com/srm/Tutorial/EventReporting/revised\\_Tutorial\\_Assets/html/Index.html](https://qxpert.quantros.com/srm/Tutorial/EventReporting/revised_Tutorial_Assets/html/Index.html)

## **LPCH Pediatric Morbidity and Mortality Conference Goals and Objectives**

### **Goals:**

- Identify areas for improvement in patient care and safety
- Improve understanding of factors that impact patient care
- Involve housestaff in ongoing systems improvement and obtain their input in these projects
- Educate housestaff in practice-based learning and improvement
- Educate housestaff in systems-based practice
- Develop action plans for systems improvement and provide follow-up

### **Learning Objectives:**

By the end of the M&M conference, participants will have increased:

- Knowledge of practice-based learning and improvement including the ability to implement change with the goal of practice improvement
- Knowledge of system-based practice including the ability to participate in identifying system errors and implementing potential solutions.
- Familiarity with ongoing patient safety and quality improvement (QI) initiatives at LPCH
- Ability to identify patient safety and QI opportunities in case presentations and patient care
- Appreciation of patient safety and QI as part of a physician's professional role

### **Framework for M&M Conference (Time allotted 50 min):**

- Review of Goals (3-5 min, Facilitator)
  - Case or System specific goals that incorporate above goals and objectives
- Case Presentation (10 min, House officer involved in case)
- Identification of systems issues as a group (10 min, as large group with facilitator)
- Development of action plan and determination of where we are in the process of improvement at LPCH (10 min, as large group with facilitator)
- Background/Data on current practices for benchmarking issue and whether there is LPCH or national data for this issue to compare (3-5 min, Dr. Sharek/Facilitator)
- Update on actions that have been implemented due to this case (5 min, QI resident)
