CSCE 204: Lab Assignment 3
09/16/13

- Create a project named "Lab-3"
- Create a form similar to the shown below. There are three groups, four textboxes, eigth labels and three buttons.

Revenue Calculator

Today is Monday, September 16, 2013

Lower Deck

Revenue

Price: [   ]

Lower Deck:

Sold: [   ]

Higher Deck:

Higher Deck

Total:

Price: [   ]

Sold: [   ]

| Calculate | Clear | Exit |

- The first label should show the current date.
- When 'Calculate' button is clicked, the 'Revenue' section will show lower deck revenue (price*#sold), higher deck revenue and the total revenue. Use **Double** variable for price and **CDbl** to convert. Use **Integer** variable for #sold and **CInt** to convert.

- When 'Clear' button is clicked, the three labels in the revenue section will be set to initial text and 4 textboxes will be cleared,

- When 'Exit' button is clicked, the application terminates.

- Zip the project folder and upload in Blackboard.
