

Baby Signs® Program By Deborah Whitfield

Babies have so much to say—but without words, communication can be frustrating! Now there's an effective way to avoid those tears and tantrums by teaching babies how to 'talk' with their hands using the Baby Signs® Program—based on simple signs that allow babies and toddlers to communicate what they see, what they need, and even how they feel. Child development experts Linda Acredolo, Ph.D. and Susan Goodwyn, Ph.D. developed the Baby Signs® Program for infants and toddlers ages 6–36 months. Their National Institutes of Health research showed that the Baby Signs® Program

- * Reduces frustration and builds trust
- * Strengthens the parent/infant bond
- * Promotes positive emotional development
- * Helps babies learn to talk sooner
- * Jumpstarts intellectual development

Come learn everything you need to know to start using the Baby Signs® Program at this fun and informative workshop. We will also be talking about the Baby Signs® Potty Training Program that teaches potty time routines and five simple potty-time signs to make potty training fun and easy from start to finish.

Price is \$20 (without kit) per educator, health worker, social worker or family. Starter Kit is \$50 and includes the price of the training. Potty Training Kit is \$50 and includes the price of the training.
