Human Papillomavirus Vaccine for Female Adolescents

The Human Papillomavirus Vaccine (HPV) for Female Adolescents measure assesses the percentage of female adolescents who became 13 years old during the measurement year and who received the three-dose HPV vaccine series, with different dates of administration, by their 13th birthday. Member compliance is based on being given the antigen on or between the member’s ninth and 13th birthdays.

WHAT CODES DO I FILE?	
When filing claims in the future, you can help improve our awareness of the services you provide related to HPV vaccines by using these codes:	
Human Papillomavirus Vaccine	
CPT Codes:	90649, 90650

Use this form to let us know about any gaps in care you may have closed for this measure. Doing so allows us to:

- Reduce the number of record requests you receive during the annual Healthcare Effectiveness Data and Information Set (HEDIS) audit.
- Target our educational outreach to members who need preventive or health services.
- Increase your reimbursement through the Rewarding Excellence program if you choose to participate.

Please complete this form.

Member Information	
ID Card Number: _____	Member’s Date of Birth: _____
First Name: _____	Last Name: _____

Option 1	
Vaccine #1 Name: _____	Vaccine #1 Date: _____
Vaccine #2 Name: _____	Vaccine #2 Date: _____
Vaccine #3 Name: _____	Vaccine #3 Date: _____

Provider Certification	
This document contains a true and accurate account of the services rendered to this patient and constitutes part of the legal health record.	
Provider’s Signature: _____	Date: _____
