4H Computes Electronic Mail Club

2002

In January, 2002 an e-mail message was sent to all the county offices informing them of a new 4-H club being organized. This club is the 4HComputes electronic mail club. Those 4H members interested in participating in this club were instructed to email a message to [4hcomputes@ext.msstate.edu](mailto:4hcomputes@ext.msstate.edu) address expressing their interest in the club. In turn, their email addresses would be added to a group list and the club would be formed.

Purpose

For several years, there has been an audience in the state that wanted a 4H computer club but usually there was not enough interested people in any one county to merit forming such a club. Also, there was a lack of volunteers who felt qualified to lead a computer oriented group. At the same time, young people were being taught computing skills in their classrooms and were acquiring a growing interest in learning more about the technology and computers that were taking control of the present and future worlds. The 4Hcomputes club can have individual members, classroom membership, and club membership. It has been formed on a trial basis and is unique in many respects. There is no standard meeting location, no certain meeting time, and the membership will vary. Hopefully, ideas will be shared and solutions found among the club membership.

Activity

Each month a problem will be sent to the membership for solving. It may be an assignment using a word processor, a spreadsheet, a database, electronic mail, a web browser, or etc. It is hoped that solutions will be shared with the club and any assistance needed by the membership will be only an e-mail message away. Also included will be information and assistance in preparing for participation in the Senior Computer Contest during 4H Congress. None of these topics are required for membership. They are available for those who are interested.

Officers

To meet the requirements for an organized 4H Club, officers will have to be selected and participants will have to participate with at least 7 e-mail messages to the club address. Processes for attendance and election of officers will be developed during the spring of 2002.
