Fixing within a shed structure

When a storage cabinet is to be installed in a shed facility you are still required to conform to the *Firearms Regulations 1974*, Schedule 4, Section 5 (Anchoring)

Section 5. Anchoring

- (1) The cabinet or container is to be securely anchored from the inside at 2 points on each of 2 separate surfaces to 2 immovable structural surfaces by means of 8 mm x 75 mm masonry fixing bolts or coach screws, as is appropriate.
- (2) At each anchor point the cabinet or container is to be reinforced with a 40 mm x 40 mm x 2 mm metal plate, or a 40 mm x 2 mm metal washer, fitted between the surface of the cabinet or container and the head of the bolt or coach screw.

Cabinets must be placed onto a solid concrete surface or immovable solid floor surface where it can be secured to the floor as described above. The 2 side anchoring points must be to a solid support beam of the shed.

When installing bolts to the support any exposed bolt heads should be either altered to prevent a spanner being fitted (rounding off with a grinder), or welded securely to the support beam to prevent loosening or tampering with the bolt. All nuts should be installed from within the cabinet and not outside. Additionally, a cabinet owner may wish to stitch weld sections of the cabinet to the upright support for security, however this is not a requirement.
