

Practice Management Webinars

From the WSMA Practice Resource Center

Re-boot Your ICD-10 Implementation Process

The clock is ticking! ICD-10 implementation is still on track for October 1, 2015. Physician practices will need to begin using those codes at that time so that their claims can be submitted for payment. Are you ready?! While some practices are well on their way to implementation, others are quickly losing ground.

This webinar is designed for physicians and practice staff that either have not yet started their implementation plan or are falling behind. We'll provide you with useful resources and recommendations on how to assess your current needs for documentation and implementation, as well as how to structure your practice's implementation efforts.

- Topics:** You will learn:
- Steps for successful implementation of ICD-10.
 - Overview of the new documentation elements in ICD-10.
 - Key guidelines that impact code selection, such as the use of the 7th character.
 - Crash course on converting your top 25 ICD-9 code to ICD-10.
 - Walk-through of important resources to guide your implementation and training process.

Who Should Attend

This program is specifically designed to assist physicians and practice staff who are falling behind with their ICD-10 implementation plan.

Presenter: **Michelle Lott, CPC, CPMA** is the Associate Director of the WSMA Practice Resource Center. She provides guidance and training on CPT and ICD coding issues via the WSMA's practice management educational programs and the *Coding Hotline*.

Date & Time: **Tuesday, August 4, 2015, 12:00–1:30 p.m. PT**
