

Algebra I Sample Items

Purpose

The purpose of this Item Sampler is to provide teachers and students with examples of the types of questions that will appear on the *ISTEP+*: Algebra I Graduation Examination. The types of questions include multiple-choice, gridded response, and constructed response. *Note: When filling in response grids, any answer that can be written as a mixed number must be entered as an improper fraction or decimal. For example, if the answer to a problem is $2\frac{1}{2}$, then the response must be entered as 2.5 or 5/2.*

For schools testing online, there is an online practice test to be given prior to the actual test. The purpose of the online practice test is to help familiarize students with the online functionalities and item types. Schools testing online are encouraged to use this item sampler, as well.

Teachers are encouraged to use this Item Sampler to:

- Familiarize themselves and their students with the types of items that will be part of the Algebra I End-of-Course Assessment.
- Gather information about students' knowledge of the standards and use that information to drive instruction.
- Assist in creating other assessments and activities.

On a related note, High Achiever (<http://dualmus.doe.state.in.us/hiach/>) is a Web-Based tool that teachers can use to create assessments and exercises based on Indiana's Algebra I Standards.

Depth of Knowledge (DOK)

Every item on the Algebra I test is assigned a "depth of knowledge" level by a committee of Indiana educators consisting of teachers and math specialists. The assignment of Depth of Knowledge (DOK) levels ensures the items on each test represent a range with regard to the cognitive demand required from students as they respond to test questions. The No Child Left Behind Act requires different levels of complexity within assessments.

See the Depth of Knowledge PowerPoint for a general overview at <http://www.doe.in.gov/core40eca/>.

Reference Sheet

The Algebra I Reference Sheet may be used on both sessions of the Algebra I test. Teachers are encouraged to use the reference sheet throughout the year to familiarize students with the structure of and information contained in the reference sheet.
