

SOIL SAMPLE INFORMATION FORM

TEXAS AGRICULTURAL EXTENSION SERVICE
THE TEXAS A&M UNIVERSITY SYSTEM

D-494

Soil, Water and Forage Testing Laboratory

Please submit this completed form and payment with samples. Mark each soil sample bag with your sample identification and ensure that it corresponds with the sample identification written on this form. See sampling procedures and mailing instructions on the back of this form. **(PLEASE DO NOT SEND CASH)**

Requirement

Describe any specific problems you have observed or want to correct:

Choose one analysis group per sample

1. Routine Analysis (R)
(pH, NO₃⁻, P, K, Ca, Mg, Na, S, and Conductivity)

\$10 per sample

2. R + Micronutrients (Micro)
(Zn, Fe, Cu, Mn)

\$15 per sample

3. R + Micro + Boron (B)

\$20 per sample

4. R + Detailed Salinity (Sal)

\$25 per sample

5. R + Micro + Sal

\$30 per sample

6. R + Micro + Detailed Lime Requirement (Lime)

\$20 per sample

7. R + Micro + B + Lime + Organic Matter + Sal

\$50 per sample

8. R + Texture Analysis

\$20 per sample

9. R + Organic Matter

\$20 per sample

Note: Organic Matter, Detailed Salinity and Texture may require longer processing time.

*Minimum requirement for establishment

Procedure for Taking Soil Samples

Taking the Soil Sample (Refer to Figure 1)

Fig. 1

- Take one composite sample for every 10 to 40 acres. A separate sample should be taken for:
 - ⇒ Areas with different soil types
 - ⇒ Areas with different land uses or fertilizer uses
 - ⇒ Areas with different terrain
- Approximately 1 pint of the composite soil sample is required for routine analyses.
- Additional sample is required for texture or detailed salinity (submit 2 sample bags marked identically).
- Avoid sampling areas such as small gullies, slight field depressions, terrace waterways, or unusual areas.
- When sampling fertilized fields, avoid sampling directly in fertilized band.

Taking a Composite Sample (Refer to Figures 2 and 3)

Fig. 2

Fig. 3

- Take a sample from 10 to 15 different areas.
- Use a spade, soil auger or soil sampling tube.
- Clear litter from the surface (do not remove decomposed black material).
- When using a soil auger or sampling tool, make the core or boring 6 inches deep into the soil (3 to 4 inches deep for permanent sod).
- When using a spade:
 - ⇒ Dig a V-shaped hole and take a 1-inch slice from the smooth side of the hole.
- ⇒ Take a 1 x 1 inch core from the center of the shovel slice.
- Repeat in 10 to 15 different places. Put in a clean plastic bucket or other non-metallic container, thoroughly mix and remove a pint (or more if additional tests are desired) as a composite sample representing the whole field or area.
- To improve the nitrate-nitrogen analysis, samples may be **air-dried** before sending to the laboratory. **Do not use heat** to dry samples. Completely fill soil sample bag or other suitable pint container. Do not use old vegetable cans, tobacco cans, match boxes, glass containers, etc. to submit samples. If more than one sample bag is used, label bags as 1 of 2, 2 of 2,

Shipping the Sample and Payment (Refer to Figure 4)

Fig. 4

- Complete the information form on the front page (information required for recommendations).
- Please include payment with the sample. Send check or money order made out to Soil Testing Laboratory. **DO NOT SEND CASH.** Please note that the **price is per sample**.
- Be sure to keep a record for yourself of the area represented by each sample.
- Be sure that sample numbers on sample bags correspond with sample numbers on the front page.
- Send samples and payment to:

**Soil, Water and Forage Testing Laboratory
2474 TAMU
College Station, TX 77843-2474**
