CONNECTICUT COMMUNITY COLLEGE NURSING PROGRAM
Capital Community College, Gateway Community College, Norwalk Community College,
Naugatuck Valley Community College, Three Rivers Community College

Formative Clinical Evaluation Form NUR*101: Introduction to Nursing Practice

Student:Date:				
Instructor: Clinical Site:				
Absences:				
Key: S = satisfactory NI = needs improvement U= unsat	tisfactory	N/A = n	ot applica	ıble
Clinical Objectives	S	NI	U	N/A
Core Value: Holistic Care Objective 1: Identify principles of holism in providing individuals		l	e to select	
a. Participate in health maintenance (i.e. range of motion, ambulation)				
b. Participate in restorative health activities (i.e. wound care)				
c. Define the client status related to the wellness-illness continuum				
d. Identify the members of the multi-disciplinary team to assist the client in meeting spiritual needs				
Core Value: Critical Thinking Objective 2: Utilize the nursing process in planning c care needs	are for inc	dividuals	with basic	c health
 I. Demonstrate critical thinking skills in the application of the nursing process when caring for assigned clients a. Assessment: Collect basic client data. Differentiate abnormal from normal data. 				
 b. Analysis/Diagnosis: 1. Develop nursing diagnosis based on collected data. 				
 c. Planning: Prioritize basic client nursing care needs Identify client goals/outcomes which are timed and measurable. 				

1 6/09

S NI U N/A 3. Develop nursing interventions for each nursing diagnosis for the assigned client 4. Identify cultural implications related to the interventions d. Implementation: 1. Implement planned care in a safe and competent manner with instructor supervision c. Evaluation: 1. Evaluate appropriateness of the nursing interventions. 2. Identify areas of revision of the plan of care Core Value: Safe and Competent Practice Objective 3: Demonstrate safe use of scientific and quantitative principles and technology in providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain elient privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned clients b. Document interactions and nursing care for assigned clients c. Communicate client information with the	Clinical Objectives				
3. Develop nursing interventions for each nursing diagnosis for the assigned client 4. Identify cultural implications related to the interventions d. Implementation: 1. Implementation: 1. Implement planned care in a safe and competent manner with instructor supervision c. Evaluation: 1. Evaluate appropriateness of the nursing interventions. 2. Identify areas of revision of the plan of care Core Value: Safe and Competent Practice Objective 3: Demonstrate safe use of scientific and quantitative principles and technology in providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned clients b. Document interactions and nursing care for assigned clients c. Communicate client information with the	Cinical Objectives	S	NI	I	N/A
diagnosis for the assigned client 4. Identify cultural implications related to the interventions d. Implementation: 1. Implement planned care in a safe and competent manner with instructor supervision e. Evaluation: 1. Evaluate appropriateness of the nursing interventions. 2. Identify areas of revision of the plan of care Core Value: Safe and Competent Practice Objective 3: Demonstrate safe use of scientific and quantitative principles and technology in providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the	3. Develop nursing interventions for each nursing	D	111		14/11
4. Identify cultural implications related to the interventions d. Implement planned care in a safe and competent manner with instructor supervision e. Evaluation: 1. Evaluate appropriateness of the nursing interventions. 2. Identify areas of revision of the plan of care Core Value: Safe and Competent Practice Objective 3: Demonstrate safe use of scientific and quantitative principles and technology in providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
d. Implementation: 1. Implement planned care in a safe and competent manner with instructor supervision c. Evaluation: 1. Evaluate appropriateness of the nursing interventions. 2. Document interactions and nursing care for assigned clients c. Communicate client information with the					
interventions. 2. Identify areas of revision of the plan of care Core Value: Safe and Competent Practice Objective 3: Demonstrate safe use of scientific and quantitative principles and technology in providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Util Use basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
2. Identify areas of revision of the plan of care Core Value: Safe and Competent Practice Objective 3: Demonstrate safe use of scientific and quantitative principles and technology in providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times c. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned clients b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
Core Value: Safe and Competent Practice Objective 3: Demonstrate safe use of scientific and quantitative principles and technology in providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
Objective 3: Demonstrate safe use of scientific and quantitative principles and technology in providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
providing basic care to individuals. a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned clients b. Document interactions and nursing care for assigned clients c. Communicate client information with the	_	ontitotivo	nringinla	c and taal	hnology in
a. Administer medication to assigned clients in a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the	· · ·	ammanve	principle	s and tech	illiology III
a safe manner b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
b. Maintain medical and surgical asepsis c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the	a safe manner				
c. Provide client care in a safe and effective manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the	h Maintain madical and surgical aconsis				
manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the	b. Maintain medical and surgical asepsis				
manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
manner d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the	c Provide client care in a safe and effective				
d. Maintain client privacy at all times e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the					
e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b. Document interactions and nursing care for assigned clients c. Communicate client information with the	manner				
e. Identify nursing care using evidence-based research f. Uses hospital based technology to provide safe nursing care: 1. Administer medications 2. Documentation of care 3. Collecting data Core Value: Communication Objective 4: Use basic communication in nurse-client interactions a. Utilize basic communication techniques for the assigned client b.
