Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.

NA = Not Applicable

NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.

NA = Not Applicable

NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.
 NA = Not Applicable
 NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.
 NA = Not Applicable
 NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.
 NA = Not Applicable
 NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.

NA = Not Applicable

NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.
 NA = Not Applicable
 NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.
NA = Not Applicable
NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.
 NA = Not Applicable
 NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.

Leapfrog's experts work with MedStat to develop a scoring algorithm for every safety and quality practice or 'leap' in the Leapfrog Quality and Safety Survey. This algorithm is applied to hospitals' answers to individual questions in the survey which gives the results that are shown on their survey results web page as "Willing to Report", "Good Early Stage", "Good Progress" and "Fully Implemented". For more information on the Leapfrog scoring algorithms and the quality index go to www.leapfroggroup.org.
 NA = Not Applicable
 NT = Not Targeted. Leapfrog members did not request the hospital's response to these questions but the hospital has voluntarily participated in other sections of the survey.
