WORKSHOPS

Evaluation and Management of Fractured Reservoirs in Conventional and Basement Rocks

Presenter : Dr. Ronald A. Nelson (Broken N Consulting)

Time: 8:30 a.m. – 5:00 p.m., Sunday, June 2, 2002
Location: Suehiro-1&2
Fee: JPY 15,000 (registrant only)
Lunch included
Limit 40 persons

This one-day course will cover the basic elements needed in the evaluation of fractured petroleum reservoirs from both an exploration and development point of view. A general sequence of study will be presented as well as the data types needed to complete the study. Techniques presented will emphasize outcrop and subsurface rock data, petrophysical data, rock mechanic principles, and reservoir performance data. A multidisciplinary approach to the study of these reservoirs will be stressed. Participants should leave the course with knowledge of what controls short-term and long-term performance in fractured reservoirs and the types of data necessary to evaluate and manage them.

Geoscientists and reservoir engineers who need to know how fractured reservoirs differ from conventional reservoirs and how to approach their study in a systematic manner will benefit from this course. The various types of fractured reservoirs will be defined with examples. Along with oil and gas industry attendees, participants working with fractured basement reservoirs for ground water and/or geothermal resources will equally benefit from the approaches discussed in this course.

Petrophysics for Exploration and Appraisal of Deep Water Reservoirs

Presenter : Mohamed Hashem (Shell)

Time: 8:30 a.m.– 5:00 p.m., Sunday, June 2, 2002

Location: Takasago-1

Fee: JPY 15,000 (registrant only)

Lunch included

Limit 40 persons

Deep water reservoirs present significant challenges that must be overcome for successful economic development. These challenges include drilling (shallow flows and unstable sediments), data acquisition (limited number of wells, difficulties in coring and logging due to poorly consolidated reservoirs), geologic (thin beds, uncertain core data), and mechanistic (fluid sampling and characterization, reservoir compaction, effective permeability, static reservoir temperature), and economic (high capital decisions based on uncertain and limited data). The deep water petrophysicist must meet all of these challenges early in the project development cycle. Getting the right information accurately and early in the exploration campaign leads to improved facilities design and reservoir models needed for development decisions, resulting in better assessment of the project.

This workshop will focus on the above issues, with particular emphasis on integrated formation evaluation required for accurate and timely reservoir description needed for development decisions. Participants will learn about data acquisition, interpretation, and integration issues associated with deep water reservoir exploration and appraisal. They are encouraged to bring their own examples for presentation.

Field Trip -Volcano & Active Fault

Lead by : Seiichi Kitani (JAPEx Research Center)

Time : Sunday, June 2, 2002

Round-trip from Oiso Prince Hotel, leaving 8:00 a.m. and returning 5:00 p.m.

Fee : JPY10,000 per person

includes chartered bus transportation, lunch, refreshments and admission fee.

Limit : 40 persons

Participants on this one-day trip of Hakone Area will learn about the geological history of volcanos, geothermal systems and the active faults and volcanic rocks forming the reservoirs of many Japanese gas fields.

Hakone is a triple volcano composed of two overlapping calderas and seven post-caldera cones. From the western rim of the calderas, there is a panoramic view of Hakone caldera and the central behind the caldera lake Ashinoko. Tanna fault is one of the active faults on the Izu Peninsula, which is left-lateral with a total displacement of about 1 km horizontally and 100 meter vertically. We see the horizontal displacement and the fault plane of the large, shallow hypocenter earthquake of November 26, 1930.

We are planning a brief walking to observe the geothermal manifestations and Hakone National Park.

Society Functions

SPWLA Annual Business Meeting and Luncheon

Date: Monday, June 3, 2002

Time: 12:00 noon - 1:30 p.m.

Location : Prince Hall

Fee: JPY3,000

The SPWLA Annual Business Meeting and Luncheon features the President's and Board Members reports. We also have the pleasure of welcoming in the 2002-2003 SPWLA Board of Directors.

Chapter Presidents' Luncheon*

Date: Tuesday, June 4, 2002

Time: 12:00 noon - 1:30 p.m.

Location: Chinese Restaurant RIHO

All current presidents of SPWLA Chapters are invited to meet other chapter presidents at a complimentary luncheon. This is an excellent opportunity to exchange ideas, discuss chapter projects, and better understand chapter relationships within the international SPWLA.

Annual Award Banquet

Date: Tuesday, June 4, 2002

Time: 7:00 p.m. - 9:30 p.m.

Location: Prince Hall

Fee: JPY5,000

The Annual Award Banquet, open to all symposium delegates, their spouses and guests, honors the outstanding achievements of the Society's award recipients and introduces these individuals to the membership. This event will be held in the Prince Hall.

Wine Sponsored by Halliburton Energy Service

Past Presidents' Luncheon*

Date: Wednesday, June 5, 2002

Time: 12:00 noon - 1:30 p.m.

Location: Chinese Restaurant RIHO

Sponsored by Outsource Petrophysics, Inc.

All former SPWLA Presidents are invited to a complimentary luncheon.

* By invitation only

Social Events

Golf Tournament

Date: Sunday, June 2, 2002

Time: 7:00 a.m. Depart from hotel lobby

Tee Time: 8:30 a.m.
