This brochure example is presented with the permission of the Department of Ophthalmology & Visual Sciences. It is a brochure that was designed by David Murrel, Creative Director at the Department of Ophthalmology & Visual Sciences, with copy written by Jennifer Burkheiser, CME Coordinator for the Department. It provides an excellent example of the information required for inclusion in promotional material for a CME activity.

COURSE INFORMATION

Glaucoma continues to be a major cause of irreversible blindness throughout the world. In order to change this outcome one patient at a time, we need to improve our recognition for treating angle-closure glaucoma, managing challenging forms of glaucoma with new technologies, and applying new information on glaucoma risk factors. Our speakers will update us on angle-closure glaucoma, glaucoma management in keratoprostheses, the Collaborative Initial Glaucoma Treatment Study clinical trial, and the gene-environment initiative relevant to open-angle glaucoma.

Course Objectives

Upon completion of this conference ophthalmologists and physicians will:

- 1) improve the recognition of different mechanisms of angle-closure glaucoma.
- 2) learn about the challenges of glaucoma management in eyes with keratoprostheses.
- 3) learn about the NIH gene-environment research initiative and the expected advances in glaucoma.
- learn about the newest "lessons learned" from the CIGTS clinical trial and glaucoma practice patterns.

The University of Michigan Medical School is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The University of Michigan Medical School designates this educational activity for a maximum of 4 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.
