

Instructional Strategies Template *(Optional)*

SLO Development Phase: In the table below, identify the top three instructional strategies you will use to address the standards included in your SLO.

Note: If an existing protocol is in place, such as the Benchmark Protocol, it can be substituted for this form.

Key Instructional Strategy	How will you implement this strategy?	What kind of formative assessments will you use to monitor effectiveness of the strategy?	How often will you assess on this content?	How will you use the results of those assessments?

Instructional Strategies *(continued)*

During SLO Implementation: Instructional strategies may change during your SLO interval, depending upon the response of students. Use this section to review and reflect on one strategy each month during your SLO interval.

Key Instructional Strategy	Month	How did students respond to the use of this strategy?	Why do you think this strategy was, or was not, effective?

Instructional Strategies (*continued*)

Complete this section at the end of the SLO interval. Reflect on the instructional strategies used throughout the year, and answer the following questions:

What strategy did you find most effective? Why do you think it was most effective?

What strategies if any, would you eliminate? Why?
