

Questions about Diabetes and CVD Tip Sheet

If You Have Diabetes, Talk to Your Health Care Provider about Your Increased Risk for Heart Disease and Stroke

If you have diabetes, you are at high risk for having a heart attack or stroke. You can help to lower your risk by managing the **ABCs** of diabetes. **A** is for A1C, a test that measures average blood glucose over the past 2 to 3 months; **B** is for blood pressure; and **C** is for cholesterol.

Talk to your doctor or other member of your health care team about the link between diabetes and heart disease. Put a check next to the questions you want to address at your next visit.

	ADA Goals	My Numbers My Goals
A1C	Below 7	•
Blood pressure	Below 130/80	
Cholesterol		
• LDL	Below 100	
• HDL	Above 45 (men)	
	Above 55 (women)	
 Triglycerides 	Below 150	
	ny ABCs be checked? ke to reach each of my ABC go	als?
Can taking medicing for a heart attack or	* *	ors or statins help me reduce my risk
What are symptoms special testing to de		I need to watch for? Do I need
What's the best wa	y for me to quit smoking?
