

AGC's Lean Construction Education Program

## UNIT 4: THE LAST PLANNER<sup>®</sup> SYSTEM

Wednesday, April 30, 2014

Lean Construction challenges all project stakeholders to develop and apply better ways to manage the overall construction process. *Unit 4: The Last Planner<sup>®</sup> System* is a half-day course that delves in creating six-week look-ahead schedules and weekly work plans.

Within construction, we all strive to plan our projects in a way that produces predictable workflow and continuous improvement. *Unit 4* is the second of two units introducing the Last Planner System (LPS). This half-day, facilitator-led course shows how to conduct make-ready and weekly work planning sessions. Following this course, participants will be able to:

- Apply the methods and tools utilized in pull planning
- Describe the concept of Lean Workstructuring
- Outline the desired products of Lean Workstructuring
- Describe the characteristics and application of the Last Planner<sup>®</sup> System

### About AGC's Lean Construction Education Program

To develop the tools needed to build lean, the Associated General Contractors of America (AGC) has developed the Lean Construction Education Program. Construction professionals at all experience levels will learn the building blocks necessary to transform their projects and companies into a lean operating system.

AGC's Lean Construction Education Program is a series of courses that progressively cover a range of topics essential to Lean Construction, including:

- Variation and pull in production
- Lean Workstructuring
- The Last Planner<sup>®</sup> System
- Lean supply chains and assembly
- Lean design and pre-construction
- Problem-solving principles and tools
