

## Performance: Performing Denture Care (C1026)

**Directions:** The following table lists the steps that are expected of you in order to properly perform denture care. The table also provides rationales that explain why you perform some of these steps.

You will be expected to demonstrate these steps in the same order as presented in this table. An observer will be grading your performance using the competency assessment observation form on page 2.

Step		Rationale	
1	Perform initial steps (i.e. greets patient by name, explains procedure to patient, washes hands, raises side rails)		
2	Raise head of bed so patient is sitting up	Prevents fluids from running down patient's throat, causing choking	
3	Put on gloves	Prevents you from contamination by bodily fluids	
4	Drape towel under patient's chin	Protect patient's clothing and bed linen	
5	Remove upper dentures by gently moving them up and down to release suction. Turn lower dentures slightly to lift out of mouth	Prevent injury or discomfort to patient	
6	Put dentures in denture cup marked with patient's name and take to sink		
7	Line sink with towel and fill halfway with water	Prevents dentures from breaking if dropped	
8	Apply denture cleaner to toothbrush		
9	Hold dentures over sink and brush all surfaces		
10	Rinse dentures under warm water, place in cup and fill with cool water	Hot water may damage dentures	
11	Clean patient's mouth with swab if necessary. Help patient rinse mouth with water or mouthwash diluted with half water if requested	Removes food particles. Full strength mouthwash may irritate patient's mouth	
12	Check teeth, mouth, tongue, and lips for odor, cracking, sores, bleeding and discoloration. Check for loose teeth. Report unusual findings to nurse	Provides nurse with necessary information to properly assess patient's condition and needs	
13	Help patient place dentures in mouth if requested	Restores patient's dignity	
14	Remove gloves		
15	Do final steps ( i.e. lower bed height and position side rails as appropriate, place call light and water within patient's reach, asks patient if anything else is needed, thanks patient, and washes hands, documents procedure).		

## **Competency Assessment Observation Form:** Performing Denture Care (C1026)

Performer: \_\_\_\_\_

Observer: \_\_\_\_\_

Date: \_\_\_\_\_

Step		Is Correct		
1	Perform initial steps (i.e. greets patient by name, explains procedure to patient, washes hands, raises side rails)	O Met	O Not Met	
2	Raise head of bed so patient is sitting up	O Met	O Not Met	
3	Put on gloves	O Met	O Not Met	
4	Drape towel under patient's chin	O Met	O Not Met	
5	Remove upper dentures by gently moving them up and down to release suction. Turn lower dentures slightly to lift out of mouth	O Met	O Not Met	
6	Put dentures in denture cup marked with patient's name and take to sink	O Met	O Not Met	
7	Line sink with towel and fill halfway with water	O Met	O Not Met	
8	Apply denture cleaner to toothbrush	O Met	O Not Met	
9	Hold dentures over sink and brush all surfaces	O Met	O Not Met	
10	Rinse dentures under warm water, place in cup and fill with cool water	O Met	O Not Met	
11	Clean patient's mouth with swab if necessary. Help patient rinse mouth with water or mouthwash diluted with half water if requested	O Met	O Not Met
