

## Our Investment Portfolio: High Quality and Diversified

At Manulife Financial, our investment philosophy is rooted in a bottom-up approach to developing an asset mix that matches the needs of our underlying liabilities. We don't limit our portfolio to fixed income investments, but hold a blend of assets that drive superior returns and risk reduction for our stakeholders. We use this disciplined approach across all our segments, and we will not chase yield in the riskier end of the fixed income market. This philosophy has resulted in a well diversified, high quality investment portfolio.

Our invested assets total C\$199.3 billion and include a variety of asset classes that are highly diversified by geography and sector. This diversification has historically produced superior returns while reducing overall risk.

Our fixed income securities portfolio is of high quality with 72% rated A or higher and below investment grade holdings are limited to 5% of the portfolio. Our private placements further benefit from covenants and collateral which provide for better credit protection and potential recoveries on default.

**“Our prudent investment approach has historically allowed us to achieve superior returns while reducing risk through diversification. We deliberately improved our credit quality in anticipation of this economic downturn, allowing our investment portfolio to remain well positioned for a challenging credit cycle.”**

Warren A. Thomson  
 Senior Executive Vice President and Chief Investment Officer
