

**Obligation  
Instruction Form  
for Extended  
CBS Downtimes**

**NOAA Obligation Entry Form if CBS is unavailable**

**Purpose:** The purpose is to track obligation amounts while the Commerce Business System (CBS) is unavailable in the event of a shutdown. This will allow for obligation amounts to be tracked and Funds Control to be maintained during extended periods of CBS unavailability.

Attached is the NOAA Obligation tracking form for use during a government shutdown or other times when the Commerce Business System (CBS) is unavailable for an extended period. The NOAA Budget Execution and Operations Division (BEX) will be providing funds control and obligation tracking during any such event. The procedure to check funds control during periods of CBS unavailability will be to request clearance from NOAA BEX to ensure obligations can be approved.

The form should be signed by the Requestor and Line/Staff Office Approving Official as appropriate and available, based on there excepted status. All requests must have a Requestor and an Approving Official signature.

To check for Funds Control please forward your request via email with the following information, Fund Code, Program Code 1-4, Project Code (required for reimbursable amounts only), FMC, and dollar amount to; Thomas F. Santymire at [thomas.f.santymire@noaa.gov](mailto:thomas.f.santymire@noaa.gov) or call 202-482-2074; with a copy to Stephen L. Smith at [stephen.l.smith@noaa.gov](mailto:stephen.l.smith@noaa.gov) or 202-482-3939.

After the document is approved/obligated the obligating document and attached spreadsheet must be forwarded to the NOAA Budget Office with the proper accounting code to ensure that all obligations are tracked and recorded once CBS is available.

Estimated Labor costs will be tracked centrally by NOAA Budget Execution Office.

**Tracking of Resources:**

To properly track the status of resources the completed form and required documents should be forwarded to Stephen L. Smith of the NOAA BEX Office. The e-mail address is "[stephen.l.smith@noaa.gov](mailto:stephen.l.smith@noaa.gov)" and work phone number is 202-482-3939, and cell phone number is 202-365-5343.
