CADAVER - BASIC, INTERMEDIATE, ADVANCED (DISC DECOMPRESSION & VERTEBRAL AUGMENTATION) AND ULTRASOUND FOR NON-SPINAL INJECTIONS

AUGUST 22-24 | LAS VEGAS, NV

FROM THE COURSE DIRECTORS

On behalf of the Board of the American Society of Interventional Pain Physicians, it is our privilege and pleasure to invite you to attend the Cadaver Workshop (Basic, Intermediate, and Advanced (Disc Decompression & Vertebral Augmentation) and Ultrasound for Non-Spinal Injections on August 22-24, 2014 in Las Vegas at the modern and exciting Planet Hollywood (located on the Las Vegas Strip) and the state-of-the-art Oquendo Center .

Our program meets continuing needs of interventionalists, based on input and needs assessment over the years and is a state-of-the-art educational program of didactic courses covering various interventional techniques and a comprehensive hands-on interventional Cadaver Workshop under fluoroscopy. The seminar and workshop is designed to accommodate training levels and capacity of participants. In response to popular demand we have added ultrasound for non-spinal techniques which will take place at Planet Hollywood.

On the first day, the comprehensive review course in interventional techniques and fluoroscopy is designed to provide interventional pain physicians with the ability to understand fluoroscopic interpretation and appropriate needle placement. This course is an essential component for interventional pain physicians and provides education opportunities to assist you in providing high-quality, competent, safe, accessible, and cost-efficient services to your patients. This course, as with all ASIPP courses, focuses on doing the right things, the right way, and for the right reasons.

The comprehensive cadaver workshop is also planned to provide necessary CME credits and/or as an in-depth review of interventional techniques. Participants will experience a comprehensive and intense learning opportunity focusing either on basic, intermediate or advanced techniques, or intraarticular injections and advanced ultrasound. Participants will also benefit from the experience of individual physicians across the United States. During the 2½ day meeting, physicians can improve existing skills and/or learn new skills and techniques.

Whether you have been practicing interventional pain management for many years or are new to the field with basic skills, we are confident you will find this course and cadaver workshop to be beneficial, as it is essential to learn new and relevant information to survive in the new millennium. Our faculty consists of many experts in the field of interventional techniques. We trust you will be as excited as we are about this exceptional opportunity for professional enhancement.

We look forward to seeing you in Las Vegas. If you have any questions, please feel free to contact the ASIPP office at 81 Lakeview Drive, Paducah, KY 42001, phone: 270-554-9412, fax: 270-554-5394, or e-mail: asipp@asipp.org

CADAVER - BASIC, INTERMEDIATE, ADVANCED (DISC DECOMPRESSION & VERTEBRAL AUGMENTATION) AND ULTRASOUND FOR NON-SPINAL INJECTIONS

AUGUST 22-24 | LAS VEGAS, NV

DESCRIPTION

This 2½ day review course and cadaver workshop includes interventional techniques (basic, intermediate, and advanced), Ultrasound for non-spinal injections, and Disc Interventions (advanced). Participants experience a comprehensive and intense learning opportunity, focusing on interventional pain management techniques.

TARGET AUDIENCE/PURPOSE

This intensive review course in fluoroscopy is planned as a CME activity for interventional pain physicians—for review, skills improvement or to fulfill state board requirements for CME hours in fluoroscopic interpretation and radiation safety.

OBJECTIVES

After this course, participants should be able to:

- Describe the delivery of multiple aspects of interventional pain management.
- Review multiple areas of interventional pain management including fluoroscopic interpretation and radiation safety
- Demonstrate skills through interactive review of images

PURPOSE AND TARGET AUDIENCE

This 2½ day review course and cadaver workshop is designed for interventional pain physicians, for a review, and skills improvement. ASIPP offers the most in-depth, comprehensive, and individualized programs available in interventional pain management, featuring maximum hands-on training with cadavers in a state-of-the-art facility and maximum ability to interact with other participants. Participants will experience a comprehensive and intense learning opportunity, focusing on interventional pain management techniques.

- Each cadaver station is limited to a maximum of 7 participants.
- Participants can choose the level of participation: basic, intermediate, or Advanced. On Sunday there is the option to attend either workshops in intraarticular injections or advanced ultrasound.
- C-arms and state-of-the-art equipment are utilized in this course. Participants are requested to dress in casual attire or scrubs. Ledged aprons and thyroid shields will be provided. However, participants are advised to bring their own protective eyewear.

The workshop is offered to improve the delivery of multiple aspects of interventional pain management. The desired outcome is to integrate multiple aspects of interventional pain management in treating your patients so that patients have better outcomes and reduced side effects.

OUTCOME

Physicians should be able to integrate multiple aspects of fluoroscopy in interventional pain management in treating their patients so that patients have better outcomes and reduced side effects for Medical Studies (IMS) and ASIPP. IMS is accredited by the ACCME to provide continuing medical education for physicians.

ACCREDITATION STATEMENT

This live CME activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education thru the Joint Sponsorship of the Institute

CATEGORY I CREDIT

The Institute for Medical Studies designates this educational activity for a maximum of 15.5 *AMA PRA Category 1 Credits™*. Physicians should only claim credit commensurate with the extent of their participation in the activity.
