Scientific Program Target Audience / Program Goals and Objectives

The primary target audience of the program consists of Child and Adolescent Psychiatrists, Psychiatrists and other specialties of medicine. This continuing medical education activity will be presented in a classroom style format, with didactic lectures supplemented with audiovisual presentations, case presentations and question and answer discussions. At the conclusion of this program, attendees will be able to:

Pharmacogenetics in Child and Adolescent Psychiatry

- Understand the basic principles of pharmacogenetics.
- Discuss how pharmacogenetics affects the tolerability of psychotropic medications.
- Discuss research to predict treatment response in child and adolescent psychiatry using pharmacogenetics.

Brain Stimulation Technologies in Psychiatry

- Understand the basic principles of Vagus Nerve Stimulation (VNS) and transcranial magnetic stimulation.
- Know the indications for VNS.
- Discuss current research in new brain stimulation techniques.

Case Presentation of VNS

- Discuss how VNS is used to treat epilepsy in children.
- Discuss possible psychological effects of VNS in epileptic children.
- Discuss the interaction of VNS with a child's psychopharmacological treatment.

Use of Multiple Psychopharmacological Agents in the Child with Severe Aggression and/or Mood Lability

- Review the current literature on the use of multiple agents in severe psychiatric disorders.
- Discuss barriers to the research on the effectiveness of two or more medications in psychiatric disorder.
- Discuss recent guidelines issued by the Texas State Department of Health Services for the use of multiple psychotropic agents for foster children.

The Ethics of the Use of Multiple Psychopharmacologic Agents in the Treatment of Children and Adolescents

- Discuss the standards for off label use of psychotropic medication in children and adolescents.
- Distinguish research from pharmaceutical company marketing in dosing and selection of agent.
- Discuss informed consent issues related to long term side effects with poly-
Psychopharmacology.

Panel Discussion: Medical-Legal Issues Surrounding the Use of Multiple Psychopharmacological Agents in Children and Adolescents

- Discuss how standard of care is arrived at and how peer review determines if care is sub-standard.
- Discuss current development in the political process regarding regulation of Psychiatric treatment.
- Provide input to colleagues on current practices in the psychopharmacology of children and adolescents.
