(The QS location number corresponds to the already existing location number of the producer company).

Hereby I commission my coordinator with the registration for the production scope "separated marketing" (460) in the QS scheme. I confirm that the following description of the production scope applies to my company:

*The production scope "separated marketing" is a possibility for the participation of producers with a legally independent marketing company.*

*The condition is that the "separated marketing" company only sells the goods produced in the own producing company, that means, that goods from third parties are not purchased. Both parts of the company should constitute one organizational unit (same ownership structure, same establishment), in which every respective part of the company operates with legal independence.*

Quality Assurance. **From farm to shop.**

I will inform my coordinator immediately if this description does not apply anymore due to modifications in the structure of the company, so that the changes are communicated to QS.
