Tel	
Fax	
E-mail	

2. AMOUNT OF CAPACITY REQUESTED AND DURATION

We hereby intend to assess market demand, in a long term basis, for an exit from France and an entry in Luxembourg firm capacity.

The form shall be completed in MWh/day in order to facilitate the completion of Non-Binding Capacity Form. The interested party will use a GCV of 11,4 kWh/m³(n) in order to convert its request into m³(n)/h at 0°C.

Capacities are offered at the following reference conditions: [GCV at 0°C; V(0°C,1.01325 bar)]. Please refer to ISO 6976 for the conversion factors of Gross Calorific Values (GCV) at different temperatures.

The daily capacity requested by shipper corresponds to 24 times the max. hourly capacity needed on both systems . Please take this point into account to calculate your needs of capacity at this interconnection point.

Please, indicate the capacity you would like to request at the interconnection point for each different pricing level for the exit tariff in France.

A firm capacity from France to Luxembourg			
Requested Capacity		Requested Period	
Pricing Level	In MWh/day	Start Date [dd-mm-yy]	End Date [dd-mm-yy]
140			
180			
220			
260			
300			

If you are interested in requesting different capacities for different requested periods, please fill out different Non-Binding Capacity Forms.

3. REVERSE CAPACITY

Besides the services under the framework of this Open Season, both TSOs are also happy to study the opportunity and the interest to offer additional capacity from Luxembourg to France. Would you be interested in such additional capacity from Luxembourg to France, may we kindly ask you to describe below such interest?

4. ADDITIONAL INFORMATION

Please indicate below any additional information you might consider relevant to this application.
