LETTER FROM THE PRESIDENT

The 1985 General Meeting is upon us - June 21, 22 and 23! We have been gratified by the number of registrations coming in, and we know there will be more to come. We have done our best to provide an informative and useful program for you. Doctor Charles Parshall will speak on diseases and problems associated with animal's eyes, specifically those affecting cattle on which he has done extensive research. The eyes are an often over-looked aspect of animal health. And our nutritionist will speak on just that - nutrition and how it relates to our small, hardy breed of cattle. Saturday will be a full day. On the lighter side, we hope to have Bob Bright's tape on training of Dexters to the ox yoke, and Kay Baker is bringing a tape of the Rieman's herd as it was shown on a local television station in Iowa.

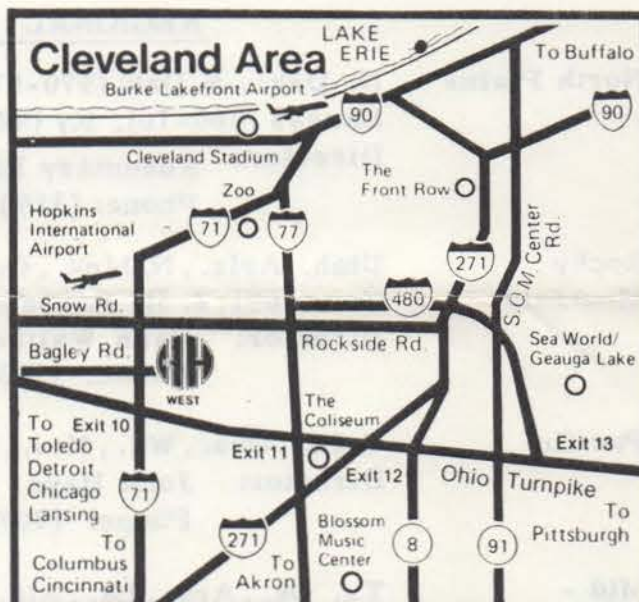

Something else we must consider at this meeting is filling the vacancies of two directorships, specifically in Regions 7 and 9. If anyone feels they have the time and would like to help promote Dexters in this manner, please advise us. We need you!

Hotel Reservation and Meeting Registration forms are included again in this bulletin. We sincerely hope you will be able to attend - we all benefit so much from talking with one another. We have a chance to learn from each other and, in turn, benefit the organization as a whole.

The following map and phone numbers will be useful when you reach this area. Please save. And do call if you have any question at all.

**Harley Hotel of Cleveland/West**  
17000 Bagley Road  
Middleburg Heights, Ohio 44130

If your plans change, please  
call (216) 243-5200 or  
(800) 321-2323 to cancel or  
alter your reservation.

SPECIAL REQUEST from a Bulletin Subscriber:

" ---- My main interest in the Dexter cow is for that of its' milk production. It seems that many breeders are turning away from the milking traits of the Dexter and concentrating on the beef aspects of the breed. I was recently reading in a book about rare cattle that the Dexter cow at one time gave around 5,000 to 6,000 lbs of milk. The chapter went on to state that there was even a cow in England that produced 12,000 lbs of milk with 4.5 fat test. Right now I am trying to find out everything I can about the Dexter cow.

I was wondering if this letter could find its' way to the news letter or to breeders who are interested in the Dexter's milk production. I would like to correspond with those who are breeding Dexters. I am looking for animals that have good milk production in their backgrounds. I know that many breeders don't keep production records, but they could give me some idea of what an average animal could produce given care and nurturing. I was wondering if different lines carried the genetic makeup for milk production as compared to other lines within the breed. ---"
