Schedule D – DRY FERTILIZER STORAGE, HANDLING AND BLENDING

Facility	Name		
Project	Location		
J	City	Street Address	County
conforn to descr	n with the requirements of Sections 255	chedule are to verify that dry fertilizer storage 5.140 and 255.150. Narrative, drawings, or so perational processes and to illustrate your plants.	chematic flow diagrams may be used
1.		n (Schedule A) or a separate drawing, show the and the distance and location of nearest reside	
2.	Unloading, Storage, Weighing, Blendi and front-end loader transfer operation	de a schematic flow diagram of all processes i ng, Impregnation, Applicator/Truck Loading, as. Identify each function or process, show flo nt. Show by graphics or notations the process	and all associated conveyor w rates and type of
3.	STORAGE FACILITIES: Describe st water pollution.	torage buildings and, if necessary, provisions to	o prevent ground or surface
4.	the clean-up practices or recovery met	OF SPILLAGE: Describe the containment or hods planned for all exposed outdoor operation, front-end loader handling, weighing, and bler water flow around the operations.	nal processes. These may
5.		ational containment and recovery systems for pender/equipment wash water collection.	esticide impregnation
6.	PARTICULATE EMISSION CONTR particulate matter/dust emissions.	OL: Describe methods, equipment or techniq	ues used to minimize
7.	BLENDING OPERATIONS, HERBIG Provide information requested in summ	CIDE IMPREGNATION, and COMPLIANCE mary.	ETIME SCHEDULE:
8.	IEPA – APC PERMIT: For facilities loperations, provide the following:	holding a current Division of Air Pollution Con	ntrol Permit for blending

Permit No. _____Expiration Date _____
