Supporting Health and Recovery

# Hearing Voices Network

## North Central Regional Mental Health Board

The CT Hearing Voices Network (CT HVN) is designed to enhance current opportunities for voice hearers, persons who see visions and have other unusual sensory perceptions to find and build supportive peer communities through support groups and community education. Our goal is to have groups throughout Connecticut supporting both individuals and the communities in which they live. CT HVN's ethos is built upon the idea that people are not broken and that they recover best when they are surrounded by others with shared experiences who view themselves as capable individuals.

Beacon Health Options, as the Administrative Organization for the CT Behavioral Health Partnership, is dedicated to recovery, health and wellness. Our guiding mission is to, "Help people live their lives to the fullest potential. To help us achieve this goal, we are proud to partner with HVN/NCRMHB as they have a longstanding commitment to improving the lives of our members.

NCRMHB is in collaboration with Beacon Health Options and the CT Hearing Voices Network (CT HVN) to enhance current opportunities for voice hearers, persons who see visions and have other unusual sensory perceptions to find and build supportive peer communities through support groups and community education.

- Create a group of trustees who form an advisory council to support the growth of a statewide network
- Collaborate with DMHAS, CTBHP, and other community supports to publicize this opportunity for voice hearers
- Increase the number of trained facilitators and groups throughout the various regions in the State of Connecticut
