

880 Grocery Products Invoice

In order to build a successful trading partner relationship that supports and enhances both our businesses, it is imperative that you understand this packet.

Key responsibilities for both parties are:

- ✓ to follow all agreed upon implementation plans,
- ✓ support and follow industry guidelines and version changes in a timely manner.

This document defines Safeway Inc.'s implementation of EDI Transaction Set 880 UCS Version 004010. It does not vary from the ANSI X12 or UCS standards. Only segments and elements required by Safeway are included in this map. All specific values are clearly noted in the description or enumerated in tables provided.

Some optional segments or data elements named in the UCS standards may not be present in this documentation but are still accepted. They may however not be processed or retained within our system applications.

This document also defines the content of selected data elements as they pertain to the way that Safeway Inc. currently does business with our EDI trading partners.

The goal of this guide is to efficiently establish an EDI invoicing relationship with your company and Safeway's Retail Accounts Payable Department. The implementation procedures are geared to ensure no loss of payments and elevate any future issues.

EDI IMPLEMENTATION GUIDE

For

UCS 880 GROCERY PRODUCTS INVOICE

Version 004010

SUMMARY OF CHANGES

Change Date	Description of Change

Start Up Procedure

Preliminary Details

Please review the mapping documents attached, including Safeway's usage notations.

Safeway will provide to you, an item list with description and unit of measure. Although we may begin testing before this step is completed, you will not be moved to a parallel mode until data synchronization is achieved and all EDI issues are resolved accordingly.

Testing

This is a phase that requires a time commitment for both parties and may involve other internal or external resources. In the interest of productivity, we expect to complete all testing within 30 days from the time the trading partner is set up in our system. The goal of the testing process is to establish connectivity, test process representative data, review and make any mapping changes as necessary.

Once you have set Safeway up as a trading partner in your system and Safeway has done the same for your company, you can begin sending in test invoices. The EDI analyst will review these test invoices for completeness and accuracy. Feedback will be provided accordingly. Once you have sent in a good invoice, the EDI analyst will pass you to Accounts Payable in a parallel mode. At this stage you will be sending all of your live invoices by EDI only.

Parallel

The parallel period is defined as paying off of the EDI invoices while continuing paper or fax communication as backup. The business users are to adjust to the EDI changes, i.e. ensure all documents are flowing through, considerations are put in place for the timing of transmissions, internal error reports are generated and distributed to the rightful owners who can act on the issues immediately, and acknowledgments are returned or received within the specified time requirement. When AP is comfortable with the EDI invoices that are being processed, they will notify you to discontinue the fax or paper backup.

Application Advice: Safeway Accounts Payable Department has a set of minimum requirements to process an EDI invoice. If these values are not present or do not match a Safeway purchase order, an EDI 824 transaction will be generated with the rejection message. A rejected invoice cannot be processed and must be corrected and retransmitted. 824 mapping specification is also available by request.

**Note – Safeway Accounts Payable Department is the only authorized party to formally communicate the completion of the testing procedure and to authorize one-time processing of a rejected or missing EDI invoice on paper.*

- **If an invoice is received with missing or invalid data, you will be contacted by phone from the Safeway Accounts Payable department. This rejected invoice can not be processed and a corrected EDI invoice must be sent to replace it.**

Production Expectations

⇒ ***Acknowledgments***

Safeway will return an acknowledgment for each inbound transmission shortly after our EDI inbound is processed. Safeway adheres to the UCC guidelines regarding acknowledgment response times.

⇒ ***System Problems***

You must inform us immediately in the event of a system problem either in transmission or any system processing that may cause a data delay. If you are using a VAN or a 3rd party, it is important that we are notified of any communication

problems you are currently encountering with that third party as well. When experiencing system problems and these problems will prevent you from transmitting invoices in excess of three business days, you need to notify immediately Safeway's Accounting Department to discuss alternative methods of communicating invoices for payment.

⇒ ***System Changes***

The Safeway EDS department must be properly notified in advance of any permanent change of processing or Duns suffix changes, or any system changes that will affect the content or format of your outbound data. Any system change that will affect the inbound processing of our data that may result in a change to how our business is handled must also be communicated promptly. We will then determine if separate testing is necessary.

⇒ ***Standard Version Changes***

All changes should be communicated to the EDS department with specific documentation on any field that you are changing as well as any inbound changes that might affect the handling of our data. Adequate time should be allowed for analysis and testing if deemed necessary. We would then mutually agree on a target date for the changeover.

SUMMARY NOTES

- ✓ N9*BM Segment with Bill of Lading number is required.
- ✓ G61 segment is required with contact information for the Accounting Department.
- ✓ Invoice should reference a valid PO Number that must be 5-digit numeric.
- ✓ Ship-To duns in PO should be transmitted back as Ship-To duns on your invoice.
 - ST Duns = 13 digits
- ✓ Bill-To duns in PO should be transmitted back as Bill-To duns on your invoice.
 - BT Duns = 13 digits
- ✓ Remit-To Address must be transmitted with your Remit-To Name + duns
(For N1*RI, N3 and N4 are Mandatory segments).
- ✓ G23 Terms Segment is Mandatory for Safeway.
- ✓ G23 Terms segment should reflect valid date, amount and percentage rate if applicable.
- ✓ G1702 Unit of Measure (UOM) must reflect accepted EDI element 355 rather than UOM on paper Purchase Order.
- ✓ 998 - Other Charge Code should only be returned if the PO reflects the same description of charge. Please use the appropriate EDI standard codes.

PO UOM	Description	EDI UOM
ME	METER	MR
BL	BALE	BA
TO	TOTE	TE
CD	CADDY	CD
BT	BOTTLE	BO
PK	PACK	PH
M	THOUSAND	TH
