TARGET AUDIENCE

This activity is designed to meet the educational needs of surgeons who perform vascular access procedures for hemodialysis patients.

PROGRAM OBJECTIVES

Upon successful completion of this activity, participants should be able to:

1. Utilize ultrasound to increase the use of suitable autogenous conduits for dialysis access.
2. Select specialized autogenous access options when standard surgical approaches are not suitable.
3. Develop interdisciplinary partnerships to provide comprehensive expert management of hemodialysis accesses for patients.
4. Identify and treat causes of early maturation failure to maximize useful AVFs.
5. Treat the common cause of arterial steal and distal ischemia with salvage of the access fistula in most cases.
