

“Of particular benefit to patients and families with information on a variety of subjects presented in an informal and easy to assimilate manner.”

— *William Oppenheim, M.D.*

This CD-ROM is intended to serve as a learning and reference tool for anyone in need of easily accessible, basic information on developmental disabilities:

- ▶ Professionals entering the field of developmental disabilities services
- ▶ Parents and professionals who would like to add to their understanding of these disabilities.

The sections on autism, cerebral palsy, epilepsy, and mental retardation offer **extensive multimedia content**, readily accessible at the click of a mouse.

- ▶ Meet individuals of various ages and levels of disability with their families — at home, school, work and play — **in over 1 hour of video documentaries.**
- ▶ Learn more about each disability through **detailed analyses** that explore: What it is, What it is not, What are the causes? What are the effects? Can it be prevented? What are the treatments?
- ▶ Interact with **rich content** that provides in-depth clinical information, definitions, illustrations, video demonstrations, internet links, and more.
- ▶ Get answers to frequently asked questions in **Ask The Experts**, featuring discussions on video by:

John Kelly Blawn Alyssa Josep

You're about to meet some wonderful people and learn about the world as they experience it.

You're undertaking a journey of discovery into what it's like to be an individual with a developmental disability of mental retardation, cerebral palsy, autism, or epilepsy.

You'll learn about the patterns of these developmental disabilities, what each one is — and what it isn't — as well as the causes, interventions, and — most important — how to unlock the human possibilities.
