

Acronis® True Image Home 2009

Back Up and Restore Made Simple and Secure

Acronis® True Image Home 2009 provides complete PC protection: back up your entire Windows® PC, plus your data, applications, settings and OS!

Acronis True Image Home 2009 is a comprehensive backup and recovery solution that protects your PC with less effort on your part and allows you to recover from the impact of viruses, unstable software downloads and failed hard drives.

Create an exact copy of your PC and restore from a major failure in minutes, or back up only your most important data and recover it even faster. Millions of PCs are protected by Acronis, the top-ranked backup and restore product for the home!

Key Features

One-click protection

Initially, you decide what, where and when to back up. After that, backups occur automatically or with just one click.

Full text search

Search for file name and/or content within an archive, using Windows or Google™ Desktop search.

ZIP® support available

In addition to Acronis' powerful TIB data compression backup format, one of the most densely compressed backup file types available to consumers, Acronis True Image Home 2009 also supports the popular ZIP format.

Dual backup

Archive your documents to disk and an external USB drive. USB drive files can be stored in Acronis TIB or Zip compressed format, or as flat (uncompressed) files.

Consolidation

You can define rules for consolidating your archives to reduce storage space. Merge an older full backup with incremental or differential backups to quickly create a new full backup.

Acronis True Image Home 2009:

Set&Forget™ Backups

Configure once and perform backups automatically.

Acronis Startup Recovery Manager

Boot your computer after a failure to start the recovery process simply by selecting the F11 key, even if your operating system has failed.

Exclude files and folders

Back up only the data you want to save disk space.

Incremental and differential backups

Acronis True Image Home 2009 gives you alternatives to performing full backups. You can also choose incremental and differential backup types. Both capture the changes made since the last backup, and with Acronis data compression, both save disk space.

Live Backups

Keep working right through your backup for maximum convenience.

Smart Scheduling

Run backups automatically at preset or elapsed time, when the user is idle, on user long/logout, on system startup/shutdown, or in coordination with other events.

Acronis Secure Zone®

Protect your system by saving an image to a special hidden partition on your hard disk where it can be accessed when the system is being restored.

Windows Vista®-style interface

The new, sleek interface of this product works on Windows XP and Vista operating systems.

Acronis True Image Home 2009 Features:

Auto backup based on destination

A user can decide to back up automatically as soon as a destination drive is available. Works jointly with existing scheduling.

Try&Decide™

You can try new software and browse the Web without endangering your computer from malware or unknown software. After testing, you can decide whether to keep or discard changes to your system. Try&Decide works across reboots and includes password protection for parental control.

Back up your entire PC

Acronis True Image Home 2009 is built on the most advanced, highly rated disk imaging technology available to consumers. Copy your entire PC, including the operating system, applications, user settings, and all data. If you suffer a system or disk crash, virus attack or other failure, you can restore the entire system disk in minutes.

Protect your applications

Use Acronis True image Home 2009 to restore all the settings for Microsoft Office®, iTunes, Windows Media Player and any other installed applications.

Migration tools make upgrades easier

PC cloning or adding a new disk is simple with Acronis True Image Home 2009's built-in migration tools. No longer must you reinstall the operating system, applications, or re-key user settings when you clone your PC or increase its storage capacity.

Security, performance and privacy tools

When you replace a hard drive on your PC, Acronis ensures you don't inadvertently give personal or organizational data to cyber thieves. Acronis Drive Cleanser, a \$50 value is included at no charge. It protects sensitive data from view by wiping a disk clean of all data. If you don't need to erase the entire disk, File Shredder safely destroys individual files so they can't be resurrected.
