

# ASAM ODS Checker V1.1.0

## Evaluate your ODS databases and ATF files with the official ASAM tool

ASAM ODS (Open Data Service) offers a standardized and well proven way of managing, saving and transporting measurement data. This includes ASAM ODS databases as well as the ASAM Transport Format (ATF). The increasing relevance of this kind of data is accompanied by an increasing number of databases, files and applications which write and read this data. Thereby the compliance with the ASAM ODS specification is of high importance.

With the ASAM ODS Data and Model Checker it is possible to evaluate the physical storage of ODS databases and ATF files for their compliance with the ASAM ODS specification 5.1.0. Thereby the tool checks the application-oriented data model, as well as the files, which are saved according to this model and supports the traditional classic format as well as the new XML format. The modular architecture of the checker allows a configuration of the data sources and the test scope.

Visit the ASAM [website](#) for more information on ASAM Checkers.

### According to the ASAM conditions I order one companywide license of the ASAM ODS Checker V1.1.0

- free** as my company is an ASAM member (not classes AP, BP or CP)
- on request** as my company is an ASAM member of the classes AP, BP or CP)
- on request** as my company is not an ASAM member

#### Information on Licensee
