EU/UNITED KINGDOM	<p>CATEGORY: Electrical appliances</p> <p>PRODUCT: Gel curing UV lamp for fingernails - 36W UV Curing Lamp for Drying of UV Gel (Nail Art)</p> <p>BRAND: Fraulein</p> <p>TYPE/NUMBER OF MODEL: Type/Model Number: 38. Product Code: NA198 and NA273.</p> <p>DESCRIPTION: Gel curing UV lamp for fingernails, 36W. Lamp has a digital display on top and comes in a purple box.</p> <p>COUNTRY OF ORIGIN: China</p> 	<p>ELECTRIC SHOCK</p> <p>The product poses a risk of electric shock because the cross-sectional area of the conductors in the supply cord is not sufficient, the connector does not have the required earthing protection and the plug and fuse supplied are not adequate.</p> <p>The product does not comply with the Low Voltage Directive (LVD) and the relevant European standard EN 60335 and the relevant national standards BS 1362 and BS1363.</p>	Withdrawal from the market ordered by the authorities.
EU/UNITED KINGDOM	<p>CATEGORY: Electrical appliances</p> <p>PRODUCT: Balance board stand - Wii Balance Board Stand</p> <p>BRAND: Blue Ocean</p> <p>TYPE/NUMBER OF MODEL: Model number is BOA025. UK.RB. Barcode - 4020628997304.</p> <p>DESCRIPTION: Balance board stand which includes a power supply. The risk is posed by the power supply only.</p> <p>COUNTRY OF ORIGIN: China</p> 	<p>ELECTRIC SHOCK</p> <p>The power supply poses a risk of electric shock because the connection to the live and neutral pins of the plug is made purely by solder. In the event of the solder failing on one of the pins a short circuit could occur. There is excess wire on the low voltage side of the transformer; if one of these wires were to become loose they could touch the input side of the board. In addition, the transformer does not provide sufficient insulation between the primary and secondary circuits. The plug face and pin sizes are considered to be too small.</p> <p>The product does not comply with the Low Voltage Directive (LVD) and with the relevant European standard EN 60950.</p>	Voluntary withdrawal from the market and recall from consumers.

Oeko Tex Standard 100 states that, to ensure optimum quality, total chromium content should be less than 1 mg/kg for children's clothing and less than 2 mg/kg for all other clothing, regardless of whether it is in contact with the skin. According to the German Federal Institute for Risk Assessment (BfR; 2007), chromium VI should actually be below the detection limit due to the substance's cutaneous sensitisation properties, i.e. its ability to cause allergic reactions such as contact dermatitis. Taking into account that the target population is children who have a tendency to suck on their clothing and that the chromium VI content is above established limit values, we consider that exposure may occur not only via the cutaneous route, but also by the oral and inhalatory route and that the products therefore pose a chemical risk.</p>	Seizure of the products ordered by the authorities.
