

ANDREW G. BACHMANN

I Current Businesses: Morris Computer Forms (MCF) was started in the fall of 1985. MCF distributes business papers, and printed products to businesses. The products range from simple copy and computer paper to custom printed computer forms and promotional printing. The firm was started after a brief training program with Union Camp Paper, with no business forms customers or specific industry experience. MCF is currently supplying 525 businesses in 25 states, by marketing an inventory management system that guarantees our customers will never run out of the forms they order from MCF.

U.S. Fax was started in 1990 as a marketer of fax paper. Mass-marketing “price competitive” fax paper in the tri-state area.

Future Business: There are plans to start a complementary business to MCF that will become a larger entity and require less intense selling.

Personal Information: Carl attended Boston University, graduating in 1982 with a B.S. in Business Management. After graduation he returned to his home town. He continued to run a small contracting company, which he had started while in school and ran on vacations. In 1983 the company was sold, and he got a job with ownership “promises” in an industrial sales company. Eleven months later he left and initiated the plan to start MCF.

Currently Carl is active in his local alumni associations and Rotary, where he was named the youngest chairman of fund raising. He is a competitive skeet and trap shooter and has two bird dogs to pursue his fall passion of upland bird hunting.

Wife Treacy is pursuing a teaching career. Seven month old son, Carl IV is a great business distraction.
