IPHC NOTIFIES INDUSTRY OF HALIBUT SALES IN 2015 AND SEEKS BUYERS INTERESTED IN IPHC RESEARCH FISH

The International Pacific Halibut Commission (IPHC) will be conducting research operations off northern California, Oregon, Washington, British Columbia, and Alaska during 2015 and will be selling halibut caught and sampled during the operations to offset costs associated with conducting the survey. This news release is intended to notify the industry of the IPHC plan to sell fish and to update lists of interested buyers in ports where survey boats will offload.

Approximately 15 vessels will be involved in the survey, with landings between early June and early September, 2015. Average trip poundage for halibut will range from 5,000 to 35,000 pounds, plus lesser amounts of rockfish and Pacific cod. All of the fish will be well-iced, and the Commission will attempt to keep all of the fish less than six days old when selling into fresh fish markets. Older fish may be landed when selling into frozen markets or as required by specific projects. The age of fish will always be communicated in the sales announcement. Suggestions from industry on how the IPHC can maximize fish quality or improve fish sales procedures are welcome.

Sales will be awarded based on our objectives of achieving a fair market price and distributing sales among buyers and ports. Sale agreements will be based on prices at the time of the sale. The Commission will not enter into any consignment or profit-sharing arrangements. The Commission plans to contact interested halibut buyers prior to each landing. Preferences will be given to buyers with a history of successfully marketing halibut and following ethical business practices. In awarding sales, the Commission will consider: (1) price; (2) the number of years buyers have been buying and marketing halibut; (3) how fish are graded **at the dock** including the determination of No. 2 halibut and chalky fish; and (4) promptness in settlements following deliveries. Obtaining a fair market price will be a primary consideration in awarding fish sales, but the Commission may award sales to buyers with slightly lower prices in consideration of the factors listed above. The Commission will also attempt to distribute sales among as many qualified buyers as possible, subject to fair market value. For deliveries in Washington and Oregon, fish from all small offloads may be awarded to a single buyer.

All buyers (including those with past IPHC sales history) interested in purchasing IPHC research fish in 2015 should complete the attached *Interested Buyer Form* and mail, fax, or email to Eric Soderlund (eric@iphc.int) at the Commission **before May 1, 2015**. You may also complete this form online if you prefer (www.iphc.int/SurveyFishBuyers). This will ensure you are kept informed of purchasing opportunities throughout our field season. For further information, please contact Eric Soderlund at (206) 634-1838 ext. 7678.

International Pacific Halibut Commission

IPHC Survey Fish Sales Terms and Conditions

1. All purchases are F.O.B. origin.
2. Payment is due fifteen (15) days from day of offload. Outstanding payments may result in suspension from future bidding.
3. Payment may be made by check or bank transfer. To initiate a transfer contact Eric Soderlund for the appropriate wire transfer routing information and routing slip.
4. Any quality complaints must be conveyed to the IPHC field biologist monitoring the offload at the time of offload and must be documented on IPHC's Fish Quality Checklist, which must be signed by the plant or contract quality inspector at the offload location.
5. Bidders must specify any deductions for chalky halibut. If no chalky fish price is given in the bid, no deduction for chalky fish will be honored by the IPHC.
6. If a buyer downgrades halibut (i.e., assess them at number two quality) due to conditions such as gaff marks and shark bites, a price paid for this grade must be stated in the bid. If a *number two price* (#2) is not presented in the bid, it will be understood that no reduction of the number one price will be made for fish deemed number two quality. Number two prices may not be submitted after the bidding closes.
7. Payment for fish offloaded in Canada may be made in USD or CAD; and, if the payment will be in USD, "Payment in USD" must be stated in the submitted bid. For payments in USD for fish offloaded in Canada, the average currency exchange rate published on Oanda.com (Interbank +1%) on the day the bid is received will be used. When "Payment in USD" is indicated on the bid, the buyer will be invoiced in USD.
