Lot 246 - Thin FOU Retouch

Postal Auction No. 128

World Stamps, Postal History & Postal Stationery
Plus
Specialised Australian Postmarks
Starting 10:00am Sunday 2nd November 2014

PPA Preamble

Welcome to Auction 128 our 6th auction for 2014. This auction offers our usual wide choice of lots, with 100s of stamp and variety lots, plenty of numeral and datestamp cancels, a wide range of postal history and postal stationery and even some postcards and ephemera lots. With over 3,700 lots there is plenty to choose from.

Quite a number of postmark collectors use our **Post Office Reference Database** on our website and a number of you pay an annual subscription of $55 to access our detailed Victorian Postmark Database. This section is now been completed through to the Zs including the Melbournes. We are starting to include images and as I write this, we are up to Bendigo. Also the Melbournes, Reliefs and TPOs have already been done. While it will obviously take quite a while to get all of the 36,000+ postmarks scanned and updated. For those who collect Victorian postmarks this is a wonderful resource. To subscribe simply go to the website (www.premierpostal.com) select **Reference Tools** from the top left menus and then select **Victorian Datestamps**. There is a **Subscribe** link in the welcome line, click on this and just fill in your details. Alternatively simply enter https://www.premierpostal.com/cgi-bin/wsProd.sh/viewfeewrapper.w? in your search engine address field.

Our **Georgian Head collectors** have been waiting patiently for the new **Brusden White catalogue** to be printed and it is here now. We have based all our catalogue numbers on the new edition, so you will see a few unfamiliar numbers there, however in most cases we include the plate position so you will be able to check back against your old catalogue quite easily. We also have stocks available and the cost is AU$125. Add your order to your bidsheet or email or call us if you would like a copy.

Our on-line bidders will be pleased to know that our new live-bidding screen seems to be working well. If you haven't used it yet then give it a try. To bid live online go to the website and log in with your Client Code and Password. Ten minutes before the auction starts an **Open Auction Live Bidding** window link will appear below the image of the catalogue front page. Simply click on this and you will be ready to go.

The pop-up window displays the last lot sold, the current lot and the next two lots. If you have already placed bids then these lots will be displayed in a bold font. A bid button will be displayed below the current lot number to bid at the next bid step. This button disappears when you have the top bid or when the auctioneer has stopped accepting bids.

Use the **View Bidsheet** menu on the top right of the home page to review or place bids for later lots. This screen will also show you the total value of your successful bids to help you manage your budget.

Remember that we only sell lots that have bids already placed on them and therefore the pop-up window will only show and allow bidding on those lots. To ensure a lot appears you will need to place some sort of initial bid on the lot, even if it is a below reserve bid.

Our clients who have access to the internet should also take time to review our retail lots. There are over 20,000 items which can be accessed and searched for in the same way the auctions can. If you have your collecting interests set up these will also work on the retail list ensuring you can access them as efficiently as possible. Please ensure that you confirm your order once you have selected the items you wish to purchase.

Our website provides many different ways of viewing those items or areas in the auction that interest you the most. We provide a standard selection in lot order, searching by topic (over 250 of them) or by country and searching by your collecting interests or a description search. Our **Image Gallery** enables you to just browse through the pictures and likewise you can also use the **Image Gallery** to just view the items that match your collecting interests.

To help with your specific collecting interests and to find the lots that interest you, we provide an extract service. This service saves you time and helps to keep our costs down. Simply provide us with your collecting interests. You can specify whether you just collect stamps, postal history or postal stationery, whether you collect mint or used, what periods you collect, what countries you collect etc. You can be quite detailed. In nearly all cases we can provide an extract which is well matched to your collecting needs.

The most effective way of bidding is to use our secure website **www.premierpostal.com**. However you can always use the printed bidsheet that comes with the catalogue and fax or mail it to us, you can also phone your bids through if you prefer. We take bids any way they come.

David, Cathy & Keith.

HOW TO GET THE MOST FROM OUR CATALOGUE
[These notes are offered as a guide to understanding the information given as symbols.]

1. Firstly, we have the lot number. If it is in **bold and <u>underlined</u>**, the item is illustrated: e.g. **<u>1234</u>**. (The actual location of the illustration is given at the end of the description: e.g. {Page 41.37} is position 37 on page 41.)

2. The second column contains a symbol, which represents the item(s) in the lot:

**	Mint, unmounted o.g.	*	Mint, mounted o.g.
Ω	Unused, no gum	Δ	Piece ("Postmarks" lots)
⊠	Cover or card		
B	Booklets	L	Literature
PS	Postal Stationery		
S	Stamp ("Postmarks" lots)		

or, in the case of used stamps, covers & Postal Stationery a grading of the cancellation:

V	Neat postmark, leaving most of the stamp design clear	F	Neat postmark, across at least half of the stamp design
G	Untidy or indistinct postmark	H	Heavy or poorly struck postmark

3. The third column gives an overall quality assessment for the lot, from 'A' to 'D'. The same standard applies to mint and used stamps, to covers, postal stationery, literature etc. An item graded 'A' is very fine; it has no faults. 'B' items are fine and may have minor imperfections. A 'C' item will exhibit obvious faults. Items in poor condition are rated 'D'. Occasionally, an item in truly superb condition will be rated 'A+'. This grading is used sparingly and is not applied to modern material, which one would normally expect to be in very fine to superb condition. An otherwise very fine item which has a subsidiary problem may be allocated an 'A-'. This may be a stamp with writing or a hinge remainder on the reverse. A cover may have a receiver's endorsement on the face. The halves of a letter card may be stuck together. A book may have a previous owner's notations. Whether this factor makes the item an 'A-' or 'B' is a matter of degree.

4. The fourth column is relevant to perforated stamps, and also to lots listed under the sub-heading 'Postmarks'.
   For **perforated stamps**, this column gives a grading for both centring and perforations. The letter 'A' to 'D' relates to centring. 'A' stamps are very well centred; 'B' stamps are slightly off-centre; 'C' stamps are significantly off-centre, and may have the perforations slightly into the design; 'D' stamps are badly off-centre, with the perforations well into the design. [**NB:** These gradings are the same for all perforated issues, whether Australian Decimals, De La Rue Colonial keyplates or 19th Century American issues. However, it should be understood that for many issues poor centring is the norm. Thus 'C', and even 'D', gradings should be expected and accepted. For such issues a 'B' stamp will be above-average and an 'A' stamp will be considered an exceptional copy.]
   Following the letter 'A' to 'D' is a number '1' to '4'. A stamp with all perforations intact is '1'. One or two short perfs, or normal rough perforations, will drop the grading to '2'. More notable perforation problems such as the perfs down one side being trimmed will result in a '3' grading. A stamp with major perforation faults will be a '4'. [**NB:** A stamp graded 'A1' is well-centred with all perforations intact. In many cases, particularly with modern issues, this is the norm. However, for many issues, 'B2' or even 'C3' may be normal and quite acceptable.]
   For lots listed under the sub-headings **"Postmarks"** and **"Ship/Paquebot Markings"**, this column gives a grading for quality of the strike, and completeness. Quality is graded from 'A' (very fine) to 'D' (poor). Completeness is graded from '1' (complete) to '5' (identifiable only). '+' is used for superb strikes; '-' is used for postmarks which are lightly struck, a little doubled, or otherwise a bit short of the mark.

5. The 5th column contains the general description of the of the lot and should be self-evident, however the following notes apply specifically to postmark description.
   Whenever possible postmarks will be described in full, except that the top portion of a postmark is only spelt out when it differs from the post office name or requires some clarification. Bracketed shaded text within a description indicates that these characters cannot be read, while greyed characters are hard to read or are only partly present, as is the case when part of the postmark is on the edge of a stamp. Very large or small letters are represented by large and small fonts respectively; small fonts are particularly used to indicate the presence of small nylon wheels in the datestamp. The following example illustrates these points:
   '[POST] OFFICE/21DE86/GARAH'.
   For postmark lots the condition of the postmark is the most important aspect of our descriptions. Minor defects in the stamp or cover are mentioned only when the value of the item is significant. Naturally, major defects will always be described.

6. The symbols in the second, third and fourth columns, and the illustrations of lots, **form part of the lot description.**

7. Figures in the right-hand column are our **estimate** of value. You may bid at, above or below estimate. The reserve price for almost every lot is 80% of estimate. Bids below this level will not be considered, except lots which have an estimate of $5 or less when bids below the reserve may be considered at the auctioneer's discretion.

8. Australian residents will have GST added to the hammer price of all lots.

9. We use the following standardised abbreviations:

o.g.	original gum	opt(d)	overprint(ed)
d/s	datestamp	cds	circular datestamp
h/s	handstamp	mss	manuscript; handwritten
ERD	earliest recorded date	LRD	latest recorded date
o/o	opened-out	RLabel	registration label
M/S(s)	miniature sheet(s)	PPC	picture postcard
cnr	corner	blk	block
impt	imprint	mtd	mounted
provl	provisional	wmk	watermark
LDL	large dateline (postmarks)	SDL	small dateline (postmarks)
TLC,TRC,BLC,BRC		Top Left Cnr, Top Right Cnr, Bottom Left Cnr, Bottom Right Cnr
