

TREASURE

47th
ANNUAL SALE

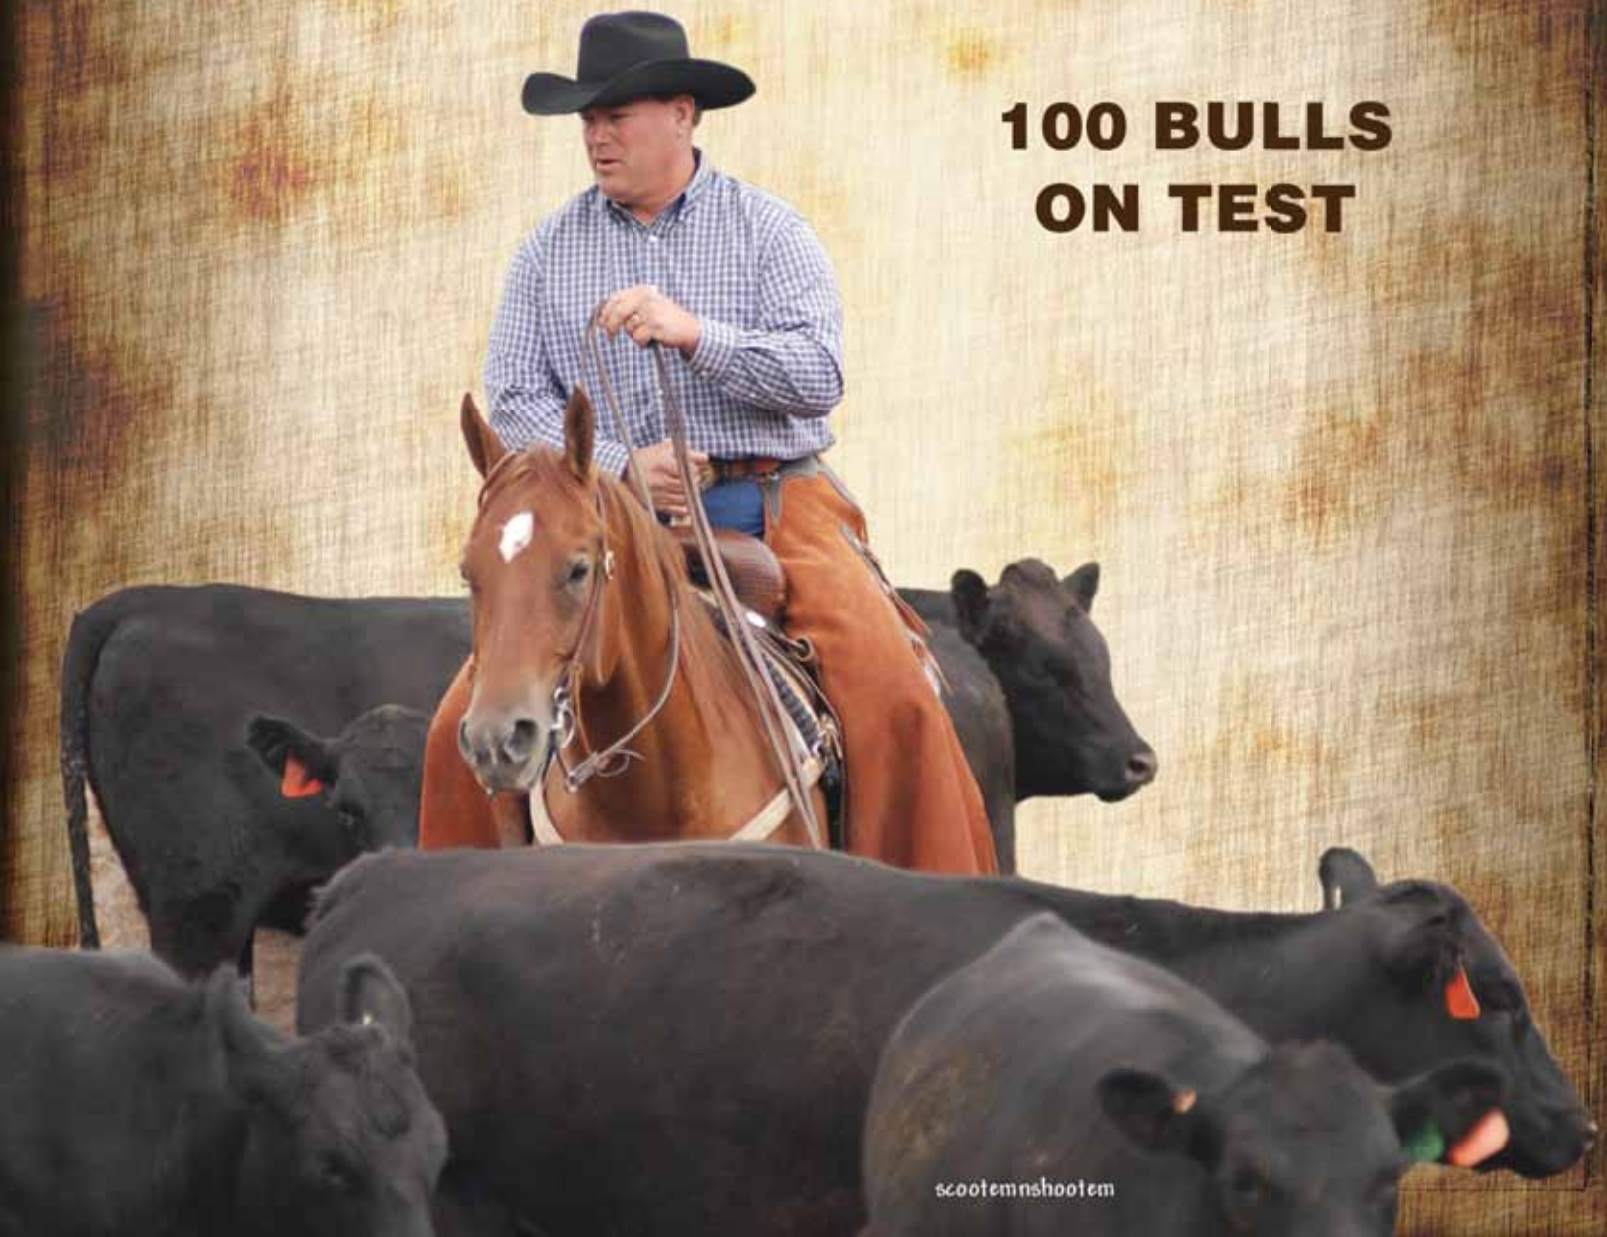

BULL TEST

Monday, April 14, 2014 • 1:00 PM

Western Livestock Auction • Great Falls, Montana

**100 BULLS
ON TEST**

TOP BREEDERS HAVE CONSIGNED THEIR BEST FROM SOME OF THE BREED'S LEADING SIRES.

As we look to this year's Treasure Bull Test sale we see a very strong set of Angus bulls on offer. The consignors have again sent some of their best to compete in this test and will offer them for sale on April 14.

The bulls represent many of the leading AI sires within the Angus breed. Every effort has been made to sell top quality bulls ready for immediate use by both seedstock and commercial producers.

The bulls will be at the sale site on Sunday, April 13 for your review. Do come and enjoy some refreshments and take a look that evening.

Russ & Barb Pepper

PHONE (HOME) 406-264-5694

## SPECIAL GUESTS

Leo McDonnell - Director, American Angus Ass'n

Jim Sitz - Director, American Angus Ass'n

Ken Cook - President, Montana Angus Ass'n

## LIVESTOCK PRESS

Kurt Kangas 661-706-2041.....Angus Journal/Angus Ass'n

John Goggins 406/698-4159..... Western Ag Reporter

Ron Frye 406/209-1640 .....Working Ranch

Jerry Gliko 406/277-3103 ..... Western Livestock Journal

Jeff Thomas 406/581-8859 .....Prairie Star

## FERTILITY

Every bull selling has had a complete breeding physical and has been semen tested. All bulls have also been tested negative for BDV and trichomoniasis.

Veterinarian: Dr. Kurt Johnson, (406) 788-0700.

## HEALTH

Bulls will be ready for immediate interstate shipment.

## TRUCKING

**Trucking is at the buyers expense and responsibility!** Several consignors will have trailers with them and will help with delivery if possible. **Please arrange trucking when settling for bulls.**

## INSURANCE

Refer to page 3 of this booklet.

## PERFORMANCE DATA

EPD's listed in this catalog are as of **March 11, 2014**

## ULTRA-SOUND MEASUREMENTS

Sonja Gregory, a certified American Angus Association technician has scanned these bulls and results of the scanning are available upon request or at the sale.

## TRANSPORTATION & ACCOMMODATIONS

Great Falls is served by several airlines. We will meet any planes if notified. Great Falls has numerous motels and we will assist with reservations. Please call us at 406/264-5694.

## TERMS AND CONDITIONS

Cattle sell under the terms and conditions of the American Angus Association. Settlement must be at time of sale unless prior arrangements have been made with the owners.

**FOOTNOTES ARE WRITTEN BY CONSIGNORS.**

**ANGUS CALVING EASE RATING (CE)**

In an effort to assist our buyers in their selections, we have coded the bulls for calving ease. This is done through the performance pedigrees of the bulls and from their actual birth weights. **IT IS A GUIDLINE ONLY!**

**ET bulls and twins are coded by their EPD's only.**

★★★ Bulls with a birth weight of 80 lbs. or less and a birth EPD of +2.5 or less.

These bulls are recommended for use on first calf heifers.

**They are identified with a green ear tag.**

★★ Bulls with either a birth weight of 80 lbs. or less or a birth EPD of +2.5 or less.

These bulls are recommended for use on large heifers or young cows.

★ Bulls with neither a birth weight of 80 lbs. or less or a birth EPD of +2.5 or less.

These bulls are recommended for use on mature cows.

**ALL BULLS SELLING IN THIS SALE ARE FREE OF ANY GENETIC DEFECTS**

**AS DETERMINED BY THE AMERICAN ANGUS ASSOCIATION.**

**Sale Day Conference Call**

*Our goal is to have you in the seats but if you can't make it sale, we're fixin' to get you "on the line!"*

**Easy as 1-2-3**

1. **In Advance-** you call the breeder to pre-register your buyer number
2. **Prior To-** the sale you will receive an email or call from the breeder with the toll free conference call number, pin number, and instructions
3. **Sale Day-** at or during the sale time, you call the toll free number and enter your pin to be place on the call.

AM BEST RATING: A VI

Most of us have read how DNA has changed the game in Livestock Evaluation. Most of us have tried to read the scientific explanations on how it works. Simply put, cattle that excelled in specific traits were tested, and DNA identified the genes (or markers) that superior animals had in common.

For example, let's look at Weaning Weight (WW). Many thousands of animals with actual weaning weights recorded were evaluated with DNA. Some with very high weaning weights had the same gene markers in common, while some with poor weaning weights possessed an altogether different set of gene markers. We can now DNA test to investigate whether an animal outside the discovery group possess these favorable markers proven for superior weaning weight. The DNA possessed by a sire is directly correlated to his ability to transmit desirable traits to his offspring.

EPDs are good, DNA makes them better.

EPDs work. They are the best information in the industry, but are inherently dynamic with something called "possible change", which says that EPDs can change significantly once progeny arrive. No fault of the system, because a pedigree prediction cannot describe which genes an animal actually got from its parents, as there are billions of possible combinations. The American Angus Association owns the most complete database in the industry, comprising millions of animal records. When DNA for these favorable (or unfavorable) markers is applied to the calculation of EPDs for each trait, they become much more accurate. In fact, Zoetis HD 50K can make EPDs up to 6 times more accurate and predictable than a pedigree prediction alone.

Another way to look at it is with Progeny Equivalents. They describe how many progeny a bull would have to sire in order for his EPDs to reflect a comparable amount of accuracy:

**Birth** – BW EPD with 50K has the same accuracy as 12 progeny birth weights turned in on your bull.

**Weaning** – WW EPD with 50K has the same accuracy as 19 progeny weaning weights on your bull.

**Yearling** – YW EPD with 50K has the same accuracy as 23 progeny yearling weights on your bull.

**Milk** – M EPD with 50K has the same accuracy as having 15 daughters in production out of your bull.

**Carcass** – CW EPD with 50K has the same accuracy as 6 progeny carcasses weighed from your bull.

**Rib Eye** – RE EPD with 50K has the same accuracy as 11 progeny carcasses measured for Rib Eye.

**Marbling** – MB EPD with 50K has the same accuracy as having 9 progeny carcasses graded.

**Ultrasound** – Carcass EPDs with 50K have the same accuracy as up to 30 progeny scanned.

Today we can reliably put bulls together for uniformity as well or better with Genomic-Enhanced (GE) EPDs than we can with half-brothers or even full brothers with non GE EPDs.

We have invested heavily in Zoetis HD 50K DNA technology to bring you the most predictable and profitable bulls you can buy. There is no additional cost to you.

For more information on Zoetis HD 50K DNA and Genomic-Enhanced EPDs visit [Angus.org](http://Angus.org), [ZoetisUS.com](http://ZoetisUS.com), or [GenomeXchange.com](http://GenomeXchange.com)

305's dam stood twice as the Supreme Champion Female, over all breeds at the Madison County Fair. She is a moderate frame cow with a classic feminine Angus head and a picture perfect udder. A full brother sold to the OW O'Brien Ranch of Coalville, UT in 2012. He remains a favorite in their herd. If you sell your calves by the pound; take note of the WW and YW EPDs on this bull. Top 5% for WW, YW and \$F. Top 1% for YW and \$F. Sire is a Proven Industry Leader.

**American Angus Association® Selection Tools Used In This Sale - \$Values - See Page 19**

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**GROWTH**

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**MATERNAL**

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**CARCASS**

**Marbling EPD (MB)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Black Top 347 is a full brother to Lots 103 and 104. One more thing about this 065 Upward bull, he is the most laid back, easy going, calm attitude bull. He has the best disposition of any bull I have been around and knows his job and does it well.

## Abegglen Livestock Kim Abegglen, Garneill, MT AB-LVS BLACK TOP 317

Black Top 317 has good depth, thickness, and muscle. Lots 103, 104 and 105 are all full brothers in blood. They are from flush sisters out of the sire, CCA Upward 065 that we own. 065 is a flush brother to the high selling bull at Midland Bull Sale in 2011, "Tombstone 050" featured at Genex. Dam good pedigrees in these bulls.

| +13 | -1.4       | +49       | +91        | +28       | +35.13 | +36.75    | +30.90  | +73.07   |

Sure fire calving ease with Brilliance on the top side and Thunder on the bottom. Sire is a "0" for BW, and Dam is a -.6 BW. This guy ranks in the top 3% of the breed for CED and BW. Not just calving ease though, he has tremendous carcass data too. He ratios as follows: IMF 131, Ribeye 102, Rib Fat 113 and Rump Fat 124.

**ANGUS CALVING EASE RATING (CE)**

In an effort to assist our buyers in their selections, we have coded the bulls for calving ease. This is done through the performance pedigrees of the bulls and from their actual birth weights. **IT IS A GUIDELINE ONLY!**

**ET bulls and twins are coded by their EPD's only.**

★★★ Bulls with a birth weight of 80 lbs. or less and a birth EPD of +2.5 or less.

These bulls are recommended for use on first calf heifers.

**They are identified with a green ear tag.**

★★ Bulls with either a birth weight of 80 lbs. or less or a birth EPD of +2.5 or less.

These bulls are recommended for use on large heifers or young cows.

★ Bulls with neither a birth weight of 80 lbs. or less or a birth EPD of +2.5 or less.

These bulls are recommended for use on mature cows.

Here is an outstanding individual that has real Herd Bull potential! This bull has been a standout since day one. His Pathfinder dam has 3 daughters that have made it to the replacement pen. He has the highest 365 day weight in our herd history. He stems from a very productive cow family, the granddam of this bull records - BR 5@101, NR 5@103, YR 5@105, REA 5@108 while maintaining a calving interval of 363 days on 6 calves.

This Ten X son brings plenty of performance with him to the party. He is from a very productive dam that was purchased from Nelson Angus Ranch. The granddam of this bull was in production as an 11 year old cow at Nelson's. This bull has a lot to offer in his numerical tabulation and has a ton of potential to sire high performing calves with excellent carcass merit.

Here is an excellent herd bull prospect that combines SAV Priority 7283 with New Day. He has a great spread in his EPD tabulation and few bulls will match his raw data. His Pathfinder granddam records - BR 3@101, NR 3@109, YR 3@115. This bull stems from the Lucky Lady cow family from Deep Creek Angus in Potlatch, ID.

If you are interested in calves with performance and want to keep your heifers, here is a bull for you. His dam is one of our Donors and is an exceptional individual. Review the maternal power in this bull's pedigree. He hails from the same Lucky Lady cow family as Lot 145. His granddam by Sitz Alliance 6595 has recorded - BR 9@102, NR 9@103, YR 5@96, IMF 5@108, with a calving interval of 368 days on 9 calves and was in production as an 11 year old cow.

## American Angus Association

### \$Value Indexes

\$Values are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A \$Value has meaning only when used in comparison to the \$Value of another animal. For example, just as with EPDs, variation in \$Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

**Weaned Calf Value (\$W):** an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F):** an index expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning performance compared to progeny of other sires.

**Grid Value (\$G):** an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B):** an index expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires. The \$B value combines the contributions of \$F and \$G.

### How do I use them?

\$Values should be used to complement the criteria that producers already use when selecting bulls.

The \$Values are not designed to be driven by a single trait, as an index is multi-trait by design. These selection tools are the result of the application of industry-relevant market values to Angus genetics for preweaning, feedlot, and carcass merit.

The \$W, \$F, \$G and \$B values on individual animals and the Sire Evaluation Report may be viewed at [www.angus.org](http://www.angus.org).
