| Pictographs |  |  |
| Data Handling Project |  |  |
| Possibility |  |  |

MATHLETICS: MEASUREMENT .... Pg 23

## LENGTH

## PRACTICAL MEASUREMENT

Work with a partner and measure with a tape measure the following. Please measure in centimetres only.

|  | Me | My partner | The difference in cm |
| :--- | ---: | :--- | :--- |
| Around the head | cm | cm | cm |
| Length of arm | cm | cm | cm |
| Around the chest | cm | cm | cm |

Using a ruler, measure the following items. Measure in centimetres and then whatever is left over, put in the mm column. You will never have more than 9 mm .

| Item |  |
| :--- | :--- |
| Width of maths book | $Z_{\mathrm{cm}}^{\mathrm{cm}} \mathrm{mm}$ |
| Length of your pencil | cm |
| cm |  |
| Length of pencil case | $\ldots \mathrm{cm}$ |
| mm |  |

## EQUIVALENT LENGTHS

| $1 \mathrm{~cm}=10 \mathrm{~mm}$ | $1 \mathrm{~m}=1000 \mathrm{~mm}$ | $1 \mathrm{~m}=100 \mathrm{~cm}$ | $1 \mathrm{~km}=1000 \mathrm{~m}$ |
| :--- | :--- | :--- | :--- |

| $1.30 \mathrm{~mm}=\ldots \mathrm{cm}$ | 2. $13 \mathrm{~cm}=$ | mm | 3. $80 \mathrm{~mm}=$ | cm |
| :---: | :---: | :---: | :---: | :---: |
| 4. $40 \mathrm{~cm}=\ldots \mathrm{mm}$ | 5. $9 \mathrm{~m}=$ |  | $6.1 \mathrm{~km}=\ldots \ldots \mathrm{m}$ |  |
| 7. $2000 \mathrm{~m}=\ldots \mathrm{km}$ | 8. $6 \mathrm{~km}=$ | m | 9. $6000 \mathrm{~mm}=$ | m |

## Measuring length in $\mathbf{c m}$ and $\mathbf{m m}$

mm

- Measure the following lines using a ruler and write the measurements in the boxes provided. Please write your answers in centimetres eg 3,6 cm. The first two have been done for you.

## $10,8 \mathrm{~cm}$

## INSTAMATHS EXERCISES

| Length | Instamaths 76 | Total 10 | Your mark: |
| :--- | :--- | :--- | :--- |
| Convert, add and subtract <br> length | Instamaths 77 | Total 20 | Your mark: |

MASS

1 tonne (t) = 1000 kilograms (kg)
1 kilogram (kg) = 1000 grams (g)
1 gram (g) = 1000 milligrams ( mg )
Change into kg or tonnes.

| 1. $2000 \mathrm{~kg}=\ldots \ldots \mathrm{t}$ | 2. 5 tonnes $=\ldots \ldots \mathrm{kg}$ |
| :---: | :---: |
| 3. $8500 \mathrm{t}=\ldots \ldots \mathrm{t}$ | 4. $1250 \mathrm{~kg}=\ldots \ldots \mathrm{t}$ |

Change into g or mg.

| $2 \mathrm{~kg}=\ldots \_\mathrm{g}$ | $5 \mathrm{~kg}=\ldots \ldots \mathrm{g}$ |
| :--- | :--- |
| $6 \mathrm{~g}=\ldots \mathrm{mg}$ | $1 \mathrm{~g}=\ldots \ldots \mathrm{mg}$ |

Change into kilograms or grams making use of the comma if need be.

| $6453 \mathrm{~g}=\ldots \mathrm{kg}$ | $5 \mathrm{~g}=\ldots \mathrm{mg}$ | $250 \mathrm{~g}=0,250 \mathrm{~kg}$ |
| :--- | :--- | :--- |
| $1 / 2 \mathrm{Kg}=\ldots \mathrm{g}$ | $3 / 4 \mathrm{~kg}=\ldots \ldots \mathrm{g}$ | $1 / 4 \mathrm{~kg}=\ldots \ldots \mathrm{g}$ |

Work out the answers to these sums. (Teachers: please help the boys to set these sums out properly.

## SECTION A

1. $3455 \mathrm{~g}+34 \mathrm{~g}+1 \mathrm{~kg}$ (convert kg into g )
2. $126 \mathrm{~mm}+24 \mathrm{~cm}+2479 \mathrm{~mm}$ (convert cm into mm )
3. $7435 \mathrm{~kg}-3782 \mathrm{~kg}$
4. $5 \mathrm{I}-359 \mathrm{ml}$ (convert litres into ml )

## SECTION B

1. 2467 tonnes $\times 7$
2. 682 ml x 25
3. 9840 litres $\div 4$
4. $7587 \mathrm{~km} \div 9$

## PROBLEM SOLVING

1. A baby is born weighing 5 kg . He loses 100 g every week for 4 weeks. How much does he then weigh? (Hint: change the 5 kg to grams. It will be easier to work with.)
2. I sent two parcels to my friend in Australia. One parcel weighed 1 kg 352 grams and the other weighed 421 grams. How much did the two parcels weigh altogether? (Hint: convert all numbers to g .)
3. I was sent two presents for my birthday! One present weighed 6 kg 436 g and the other 2 kg 750 g . What was the difference in weight between the two? (Hint: convert all numbers to g.)

## INSTAMATHS EXERCISES

| Mass | Instamaths 78 | Total 10 | Your mark: |
| :--- | :--- | :--- | :--- |
| Mass: conversion | Instamaths 79 | Total 10 | Your mark: |

## READING SCALES (1)

The scale shows 1 kilogram, each big division is 100 grams, each small division is 20 grams. Please label the scale, starting at the first dark line which is 0 g . Then fill in $100 \mathrm{~g}, 200 \mathrm{~g}, 300$ $\mathrm{g}, 400 \mathrm{~g}, 500 \mathrm{~g}$ right up to the bottom dark line which will read 1 kg . Please put these numbers on the right hand side of the scale - right next to the dark line.

Colour the line that you are having to read and put in the 2 answers below.

## A SPRING BALANCE SCALE

Please write the answer in grams.

| a) | b) |
| :--- | :--- |

## READING SCALES (2)

Weighing scales can be read like a clock, the dial indicator moves as the weight increases. Each big line is 100 g , each small line is 10 g , and the arrow shows 240 g .

Draw arrows on the scale to show these weights. Please use a ruler and point right up to the place you are marking.
a) 520 g (blue)
b) 960 g (green)
c) 1000 g (red)

## PRACTICAL ACTIVITY

Get scales from the "maths department". Each boy must weigh himself on a bathroom scale and write down his weight - you don't have to tell anybody if you don't want to!

Then collect 5 items each, and in your groups, estimate how much you think the items weigh. Then weigh them and see how correct you were.

## CAPACITY (PRACTICAL)

Measure 1 litre, then 500 ml to get acquainted with the amounts. Choose 3 different containers at home and list them in the first column. First estimate the capacity of the container and then measure it carefully. Write the measurements down neatly in the correct columns. Please write $m \ell$ or $\ell$ (as a cursive $\ell$ ) next to your answer.

| Object | Estimation | Capacity |
| :--- | :--- | :--- |
| 1. |  |  |
| 2. |  |  |
| 3. |  |  |

EXECISE 1: Please do not write a number only for your answer. You must write litres ( $\ell$ ) or $m \ell$ next to the answer. I have done the first one for you!

| 1. If I have $1 \boldsymbol{\ell}$ of water and I drink half of it, how many $\boldsymbol{m} \boldsymbol{\ell}$ do I have left? | $m \ell$ |
| :---: | :---: |
| 2. A can of coke is 300 ml . I drink half of it. How much do I have left? |  |
| 3. I need a total of 500 ml to water my plants and my watering can holds $100 \mathrm{~m} \ell$. How many times do I need to fill it up? |  |
| 4. If I have $400 \mathrm{~m} \ell$ in a bottle and I add $600 \mathrm{~m} \ell$, how much do I now have? |  |
| 5. If I pour $30 \mathrm{~m} \ell$ of water into a bowl and $50 \mathrm{~m} \ell$ of milk. How much liquid is there in total. |  |
| 6. A cup of tea is 50 ml and I drink 4 cups a day. How many ml of tea do I drink in a day? |  |

CONVERSION EXERCISES

| 1 litre $=1000 \mathrm{ml}$ | $\mathcal{J}$ kilalitre $=1000$ litres |
| :---: | :---: |

## EXERCISE 1

Convert the following ml into $\ell$ and $\mathrm{m} \ell$. Look at the following examples

| $1245 \mathrm{ml}=1 \ell 245 \mathrm{~m} \mathrm{\ell}$ | $1034 \mathrm{~m} \ell=1 \ell 34 \mathrm{~m} \mathrm{\ell}$ | $2 \mathrm{~m} \mathrm{\ell}=0 \ell 2 \mathrm{~m} \mathrm{\ell}$ |
| :--- | :--- | :--- |

| 1) 1237 ml | $\ldots \ell \_m \ell$ | 2) $97 \mathrm{~m} \mathrm{\ell}$ | $\ldots \_\ell \_m \ell$ |
| :--- | :--- | :--- | :--- |
| 3$) 8 \mathrm{ml}$ | $\ldots \quad \ell \ldots \ldots$ | $\mathrm{m} \ell$ | 4) $5487 \mathrm{~m} \mathrm{\ell}$ |

## EXERCISE 2

Convert these capacities into $m \ell$ and litres eg. $1 \ell 400 m \ell=1400 \mathrm{~m} \mathrm{\ell}$; $6 \mathrm{kl} 300 \ell=6400$ litre

| 1) $1 \ell 7 \mathrm{~m} \mathrm{\ell}$ | $m \ell$ | 2) $1 \ell 79 \mathrm{ml}$ |  |
| :---: | :---: | :---: | :---: |
| 3) $1 \ell 122 \mathrm{~m} \mathrm{\ell}$ | $\ldots \mathrm{ml}$ | 4) $1 \ell 435 \mathrm{ml}$ | $\ldots l$ |
| 5) $7 \mathrm{Kl} 254 \ell$ | _ $\ell$ | 6) 1 Kl 756 l | 1 |

1. I drink $1344 m l$ of my 2 litue coke. How much is left? (Hint: change 2 litres into ml ) $\qquad$
2. A bath holds 80 litres, a shower takes 35 littes and watering the garden takes 179 litres. How much would be left if my water tank at the start had 642 litres?

3. A jar has 560 ml of jam. 342 ml is used. How much is left?
4. You have collected some rain water in a bucket. The bucket holds 5565 ml . I use 3765 ml to water some plants. How much is left?

INSTAMATHS EXERCISES

| Capacity | Instamaths 80 | Total 10 | Your mark: |
| :--- | :--- | :--- | :--- |
| Reading capacity markings | Instamaths 81 | Total 10 | Your mark: |

| Perimeter and area | Instamaths 82 | Total 10 | Your mark: |
| :--- | :--- | :--- | :--- |

## MEASURMENT: Please highlight the correct units.

7 am - I had a wash in 3 (secs, $\ell, m \ell$ ) of water.
7.30am - For breakfast I had $200(\mathrm{~kg}, \mathrm{mg}, \mathrm{g})$ of cereal, with $100(\mathrm{~g}, \mathrm{~m} \ell, \ell)$ of milk. I also had a cup of tea, with $1 / 2 a(g, \ell, m)$ of sugar in it.
8.10am - I had to run for the bus today. The bus stop is $100(\mathrm{~m}, \mathrm{~km}, \mathrm{ml})$ away from my house.
11.00am - During break I shared out a litre bottle of lemonade between five glasses. We each had $200(\ell, m \ell, g)$ of lemonade.
3.15pm - This afternoon we had P.E. I kicked the football 14 ( $\mathrm{m}, \mathrm{cm}, \mathrm{km}$ ).
4.30pm - My brother is running in an Athletics competition this evening. He is running in the $1500(\mathrm{~m}, \mathrm{~km}, \mathrm{ml})$ event. He can run that distance in 6 ( mins, hrs, secs). My brother is taller than I am. He is $1,82(\mathrm{~cm}, \mathrm{~km}, \mathrm{~m})$ tall.
7.30 pm - The road outside our house looks like a river! The main water pipe has burst and there are ( $m \ell, \mathrm{~m}, \ell$ ) of water gushing down the road.
7.45pm - I am going to watch a film on TV. It is $1 \frac{1}{2}$ ( mins, hrs, secs) long.
9.15pm - I have just weighed my pet hamster, Gerald. Well, I tried to weigh him, but he jumped off the scales just as the arrow reached $1(\mathrm{~kg}, \mathrm{~g}, \mathrm{mg})$.
9.30 pm - Time for bed! I have to get up in 10 ( m , mins, hrs ). Before I went to sleep I had 250 ( $\ell, \mathbf{m g}, m \ell$ ) of tea to drink.

## MONEY : SHOPPING LIST (CALCULATOR EXERCISE)

| Tea | $R 5,50$ | Chocolate | $R 4,35$ |
| :--- | :--- | :--- | :--- |
| Coffee | $R 6,00$ | Hotdog | $R 3,25$ |
| Burger | $R 10,00$ | Doughnut | $R 4,95$ |
| Ice Cream | $R 7,55$ | Chips | $R 3,72$ |

## 1. If I went shopping:

a) how much would it cost me if I bought 3 tea, 2 hotdogs and 1 burger?
b) how much change would I get from a R50 note?

| Tea | $R 5,50 \times 3=$ |  |
| :--- | :--- | :--- |
| Hotdog | R3,25 $\times 2=$ |  |
| Burger | R10,00 $\times 1=$ |  |
|  | TOTAL SPENT $=$ |  |
| Change from R50 note? | R50,00 - |  |

## 2. If I went shopping:

a) how much would it cost me if I bought 4 chocolates, 2 ice-creams and 5 packets of chips/
b) how much change would I get from a R100 note?

| 4 chocolates | $\mathrm{R} 4,35 \times 4=$ |  |
| :--- | :--- | :--- |
| 2 ice-creams | $\mathrm{R} 7,55 \times 2=$ |  |
| 5 packet of chips | $\mathrm{R} 3,72 \times 5=$ |  |
|  | TOTAL SPENT $=$ |  |
| Change from R100 note? | R100,00 - |  |

## SPACE AND SHAPE: 2D AND 3D SHAPES

- 2-D shapes are 2 dimensional. This means they have no thickness.
- All these 2-D shapes are polygons. A polygon is a many sided shape with straight lines.
- To be a regular polygon, all the sides and angles must be the same.
- An irregular polygon has unequal sides and angles ( such as the arrow, star and cross).

## 2-D SHAPES - POLYGONS

Triangle (3)

## INSTAMATHS EXERCISES ON 2D AND 3D FIGURES

## COMPUTER GAME ON QUADRILATERALS

Go to Maths folder
Choose "Space Station Alert"
Go to Start Activity
Choose Quadrilaterals an
EXERCISE: Make a cube

## STRAIGHT LINES /CURVED LINES

In geometry you will learn about shapes and lines. There are two main types of lines straight lines and curved lines.
a) Draw a picture made up entirely of straight lines. Use a ruler and colour it in to make it look good. Remember everything has to be straight !
b) Now draw and colour a picture made up entirely of curved lines. Use the whole page and colour it in.
c) Use a ruler to draw a straight line pattern. Choose three colours and then colour it in. Don't make your patterns too small otherwise you will spend forever colouring them in.

## DATA HANDLING

| Tally lines and <br> frequency tables | Instamaths 91 | Total 10 | Your mark: |
| :--- | :--- | :--- | :--- |
| Pictographs | Instamaths 90 | Total 10 | Your mark: |
| Reading a Bar Graph | Instamaths 92 | Total 10 | Your mark: |
| Probability | Instamaths 93 | Total 20 | Your mark: |

TALLIES ..... A PET SURVEY (ONLY 1 ANIMAL PER BOY)
(Do Ex 91 in Instamaths before you do this exercise)
Ask 15 boys in your class what of the following pets you have at home. Show your answers in a talley table and then complete a BAR GRAPH with your results. They boys must only mention 1 animal - your totals cannot be more than 15.

| Type of Pet | Tally | Total |
| :--- | :--- | :--- |
| Dog |  |  |
| Birds |  |  |
| Cat |  |  |
| Fish |  |  |
| Rats/mice |  |  |
| Hamsters |  |  |
| Other |  |  |

|  | Dog | Birds | Cat | Fish | Rats/ mice | Ham ster | Other |

Animals

A graph is a visual tool that makes it easier to see information. It uses pictures, circles, bars and lines to show and compare information. Shown below are the 1984 populations of three USA cities in four different types of graphs.

| Pictograph |
| :---: |
| 1984 Population in Selected Cities |
|  |
| $\underset{\substack{\text { Los Angeles, } \\ \text { Caliornia }}}{9} 9$ |
| $\text { Houston, Texas } A f$ |
| $\text { key: } X=1 \text { million people }$ |
| - Bar Graph |

Circle Graph
1984 Population in Selected Cities

1984 Population in Selected Cities

## CIRCLE OR PIE GRAPHS

In a circle graph you can see how things are divided into the parts of a whole. In this graph we see the amounts of fruit sold at a produce stand in a week in July.

1. What fruit sold the most at Mr O' Henry's Fruit Stand? $\qquad$
2. What fruit sold the least? $\qquad$
3. Rank the order of the fruits that were sold. Number 1 will be the fruit that sold most, number 5 , least.
$\qquad$

## BAR GRAPHS

A bar graph shows us many different types of things by the height of the bars.
Looking at this bar graph of temperatures on the playground, and write down:

1. The temperature at $8: 00 \mathrm{am}$ $\qquad$
2. The temperature at $12: 00 \mathrm{pm}$ $\qquad$
3. At what time of the day was the temperature 60 degrees? $\qquad$
4. At what time of the day was the temperature 85 degrees?

|  |  | $\begin{aligned} & \frac{1}{3} \\ & \text { O} \\ & \text { O} \\ & \text { O} \\ & \hline 0 \end{aligned}$ |  | 윽 <br> 0 <br> 0 <br> 0 <br> $\frac{1}{1}$ <br> $\frac{1}{0}$ <br> 0 | - |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Bloemfontein | 1 | 988 | 658 | 405 | 465 |
| Cape Town | 988 | 1 | 1621 | 1390 | 1450 |
| Durban | 658 | 1621 | 1 | 565 | 625 |
| Johannesburg | 405 | 1390 | 565 | 1 | 60 |
| Pretoria | 465 | 1450 | 625 | 60 | 1 |

Kilometers

Use the above table to work out the distance between these cities.
a) Bloemfontein and Durban $\qquad$ km
b) Johannesburg and Cape Town $\qquad$ km
c) Pretoria and Bloemfontein $\qquad$ km
d) Cape Town and Pretoria $\qquad$ km
e) Which cities are 658 km apart?

## DATA HANDLING PROJECT

## PLEASE PRINT YOUR HEADINGS - DO NOT DO CURSIVE!!

a) Choose $\mathbf{5}$ items (vegetables, cars, foods etc) and write them down in list form in a reporter's notepad.
b) Ask your classmates to tell you which one of your list is their favourite item. Put a tick next to that item.
c) Using a ruler, draw a BAR GRAPH making sure each column is 2 cm wide.

- Your graph must have a heading in capital letters eg VEGETABLE FAVOURITES. This must be above the graph and centered.
- Put underneath each column, what item is represented in that column (eg banana, apple, pineapple) and underneath the word, write the number of people who voted for that item.
- Leave a line, and underneath the word and number, write in capital letters what this group of words represents eg VEGETABLES. Centre it.
- On the left hand side, number your graph in 2's - going up to 16. Make sure that your spacing is equal to 1 line spacing in your book. You must draw a little straight line on the line where the number is to go.
- Next to that, in capital letters, write CLASS. You can also write CLASS going downwards.
- Now colour your graph in accurately.

## ALLOCATION OF MARKS

| 1 | Bar graph drawn with a ruler. | 1 |  |
| :--- | :--- | :--- | :--- |
| 2 | Columns 2 cm wide. | 1 |  |
| 3 | Heading in capitals (above graph) - Centre it. | 1 |  |
| 4 | 5 printed names of the vegetables under each column and the <br> numbers of the people who voted for them. | 1 |  |
| 5 | Leave 1 line and underneath the names write the word that <br> represents your 5 items eg VEGETABLES in capital letters. <br> Centre it. | 1 |  |
| 6 | Pupil numbers on left - numbers being placed right next to a <br> line, not floating somewhere in space!!!! Going up in 2's to 14. | 1 |  |
| 7 | On the left, write CLASS in capital letters (either vertical or <br> straight) | 1 |  |
| 8 | Colour your graph in accurately. Do not colour over the line you <br> have drawn. | 1 |  |
| 9 | Overall neatness | 2 |  |
|  |  | 10 |  |

## MATHLETICS: MEASUREMENT

| MEASUREMENT : TERM 3 |
