19 Summer St. Greenfield, Mass.

January 20, 1986

Mr. Howard Kobin 51 Long Plain Road Leverett, Mass.

Re: Shays St., Smherst, Mass. 01002

Dear Mr. Kobin:

This will certify that on January 15, 1986 I conducted deep soil observation and percolation tests on a parcel of land located on the north side of Shays St., Amherst, Mass.

Charles Drake, R.S. was present as an observer for the Town of Amherst.

Copies of soil logs are enclosed.

Test Pits #1 and #2 were located 400' north of Shays St. and 250' east of the west property line.

Test Pits #3 and #4 were located 450' north of Shays St. and 300' east of the west property line.

The percolation rate for both areas was 3 mins./inch.

Justification for Granting a Variance for an Individual Sewage
Disposal System at 160 Shays Street

- I. It would constitute a manifest injustice to require a tie in to the town sewer:
 - A. Price Difference:
 - 1. Individual septic system \$2,200 (L & F Const. Co)
 - 2. Ejector Pump System \$7000 (Plumbing-Pickering)
 1800 (Trench-L&F Const.)
 500 (Sewer Connection Fee)
 ? (Install Pipe)
 TOTAL \$9300 plus pipe installation
 - B. Inferiority of Ejector Pump System:
 - 1. Professionals have advised against pump system
 - a. Plumbers Pickering, Denno, Shipman
 - b. Engineers Tighe & Bond, Almer Huntley
 - c. Builder Jim West
 - d. Excavator Larry LaClaire
 - 2. Neighbors (Heatherstone Road) have had terrible experience with pump systems
 - a. Letters from Schmitt & Nober
 - Fails during power outages, pump malfunction, heavy rains
 - c. Failures constitute a health hazard and decrease house value
- II. Individual septic system would provide adequate environmental protection
 - A. This is an area of very low population density
 - 13.5 acre parcel (Trotman-Collins-Wade) could have at most two septic systems (Collins & Wade)
 - Area bounded on three sides by undeveloped land.
 Two sides (N & E) bounded by Amherst College land which is unlikely to be developed.
 - B. Presents no threat to water supply
 - 1. According to James Smith, town engineer, this land is not on the aquifer or the recharge area for public water supply
