A family birth plan allows parents- to- be the opportunity to plan and anticipate their birth experience. Every effort will be made to honor the requests of parents-to-be throughout the childbirth experience. If the unexpected occurs, rest assured that the MUSC Women and Infant Services Team will work to provide the best care available to the new mother and infant. Should emergency complications arise, components of the birth plan may not be available. We will work to ensure you are informed should this occur.

Epistotomy

Y/N (Check to indicate yes)

I would prefer not to have an episiotomy unless absolutely required for the baby's safety.

- I would appreciate guidance in when to push and when to stop pushing so the perineum can stretch.
- If possible, I would like to use perineal massage to help avoid the need for an episiotomy.
